4-unit freestanding mailbox Design BASIC 385-VA ST-R with doorbell box - stainless steel V2A, brushed | Top | Stainless steel, brushed | with 4 mailboxes

Product number 385-VA-4S-SP

Product description

Freestanding 4-unit mailbox system BASIC 385 for 4 households – narrow, vertically oriented version with bell/intercom module – brushed stainless steel V2A

With 4 separately usable compartments, the freestanding BASIC 385 provides a clear mail solution for apartment buildings, smaller residential complexes and office or practice premises. The freestanding installation allows flexible positioning where the unit is easily accessible for residents and delivery personnel.

The S version is vertically oriented and uses the available unit width particularly efficiently – ideal for narrower property access points.

The mailboxes are made from weather-resistant stainless steel V2A 1.4301 and are finely brushed. A close-fitting side cladding with rain hood unites the individual mailboxes into a closed overall unit.

Each compartment features an insertion slot of 35 × 265 mm for DIN C4 items in portrait format. A noise-damping rubber lip reduces impact noise, while the front access doors open from left to right. Each mailbox includes two keys with key number and an interchangeable nameplate below the insertion flap.

The integrated bell/intercom module combines the doorbell function and preparation for an intercom system directly in the mailbox unit.

The advantages of the BASIC 385 at a glance

Massive stainless-steel stand elements

Round-tube stand elements with approx. 60 mm diameter made from brushed stainless steel V2A 1.4301 form a stable base for the freestanding mailbox unit. The robust construction is designed for long-term use at the property entrance.

Large letter slot according to DIN EN 13724

The insertion opening of 35 × 265 mm is designed for DIN C4 items in portrait format. Larger envelopes can also be inserted without folding.

Quiet insertion and comfortable collection

A noise-damping rubber lip reduces the impact of the insertion flaps. Mail is removed from the front via doors that open from left to right.

Entirely made from brushed stainless steel

The stainless-steel finish combines mailboxes, cladding and stand elements into a high-quality, low-maintenance overall unit.

Bell/intercom module directly integrated

The bell/intercom panel is integrated directly into the mailbox unit.

Equipment of the BASIC 385 mailbox system

Mailbox unit

Design Narrow, vertically oriented design
Number of mailboxes 4 separately usable compartments
Mailbox material Stainless steel V2A 1.4301
Finish Stainless steel V2A 1.4301, brushed
Rain hood / side cladding Stainless steel V2A 1.4301, brushed
Manufacture Made in Germany by Briefkasten Manufaktur Lippe

Mail and operation

Insertion opening 35 × 265 mm, suitable for DIN C4 portrait
Insertion flaps With noise-damping rubber lip
Mail collection Front access
Door opening Opens from left to right
Keys 2 keys with key number per mailbox
Nameplate Interchangeable nameplate below the insertion flap
Standard Mailboxes in accordance with DIN EN 13724

Stand elements and equipment

Stand elements Round tube approx. 60 mm from stainless steel V2A 1.4301, brushed
Mounting options Optional for screw fixing or setting in concrete
Fastening Bolt anchors for screw fixing not included; select separately to suit the foundation
Bell/intercom module Integrated functional panel
Intercom preparation Speaker aperture with universal adapter for standard flush-mounted loudspeakers

Mailbox size and volume

The BASIC 385 is available with different mailbox sizes depending on the product configuration. The standard version 300 × 110 × 385 mm offers approx. 12 litres volume; depending on the variant, 300 × 220 × 385 mm with approx. 25 litres volume is also available.

Installation by setting in concrete

For the freestanding unit we recommend a suitably dimensioned concrete foundation. When setting in concrete, the stainless-steel stand elements must be aligned plumb and permanently anchored in the foundation. Foundation size and embedment depth should be matched to the ground conditions, unit weight and local circumstances.

Screw fixing to a foundation

For screw fixing, a level and load-bearing concrete foundation is required. Suitable bolt anchors or fastening means must be selected to suit the subsoil and the load on the unit. For the BASIC-385-ST-R versions, bolt anchors are not included in the standard scope of delivery.

Note on weather protection

Mail is best protected from moisture and contamination when fully inserted and the insertion flap is closed. Protruding items can prevent the flap from closing completely. Under extreme weather conditions, moisture may enter the mailbox despite standard-compliant design.

Note on bell and intercom technology

The bell/intercom module is prepared with a speaker aperture and universal adapter for common built-in loudspeakers. Intercom systems or built-in loudspeakers are not included in the standard equipment. Planning, connection and commissioning of electrical components should be carried out by a qualified electrician.

Product properties

Series	BASIC
Number of bell push buttons	4 buttons
Functions	Light button, Intercom
Functional box prepared for manufacturer	GIRA, Busch Jaeger, Siedle, STR Elektronik, ELCOM, TCS, Ritto, ALGO, Telegärtner, Auerswald, Legrand Bticino, Comelit
Boxes by volume	Normal > 10 litres
Number of boxes	with 4 letterboxes
Name labelling	Nameplate
Mounting type	Free-standing
Material	Stainless steel V2A 1.4301
Removal of mail	On the front
Surface/colour	Brushed
