COMELIT apartment station LS8741 – 5? Wi?Fi hands?free indoor monitor LOGOS with mobile function for 2?wire

Product number 1299-LS8741

Product description

Comelit LS8731 - 5" LOGOS video call station with hands-free function for Simplebus 2

The **Comelit LS8741** combines a high-quality 5″ colour TFT display, modern hands-free function and WLAN connectivity in an elegant, compact housing. As part of the LOGOS series, it is ideal for integration into **Simplebus 2+ systems** and offers future-proof cloud and smartphone functions - for maximum control and flexibility in access management.

- **5″ colour TFT display:** High-resolution and clear - perfect overview when calling the door.
- **Hands-free audio:** Convenient hands-free function without handset.
- **Integrated Wi-Fi module:** Full app control & remote access worldwide - even in the 3G/LTE network.
- **Mechanical buttons:** Intuitive operation for door opening, intercom & co.
- **NFC programming with MyComelit app:** Easy set-up even when the device is switched off.
- **CFP input & I/O interfaces:** Storey call, panic function or actuator control can be used individually.
- **Easy to install:** Metal backplate & riser terminal included.

WiFi function & app connectivity

This version of the LS8741 is equipped with an integrated WiFi system. After installation and the free app (available for Apple iOS and Android), you can connect the monitor to your smartphone in just a few steps. A one-off registration with the Comelit cloud is all it takes to **access your indoor intercom from anywhere in the world** - securely and at any time.

Image and sound are transmitted in high quality and with virtually no delay. The Comelit app makes it easy to answer door calls, make calls and open doors or gates remotely. The **push function** ensures that the app also provides active notifications in the background - the connection is established via WLAN and mobile networks (3G / LTE).

With the door station and the app, you can **simulate presence at home**, even when you are out and about. If the postman, a neighbour or an unknown visitor rings the doorbell, you can communicate via smartphone or tablet - just as if you were at home. Thanks to the combination of 2-wire technology and WiFi, the delay in receiving calls on mobile devices is only around 5 seconds.

Why the LS8741 is impressive

1. **WiFi & cloud integration:** control via smartphone, app notification and remote opening.
2. **Modern operation:** 5″ display, hands-free function and haptic buttons.
3. **Quick commissioning:** NFC setup via MyComelit app - simple and secure.
4. **Versatile:** For single and multi-family homes, offices and commercial properties.
5. **Easy to install & reliable:** Accessories included for immediate installation.

Areas of application

The LS8741 is ideal for single-family homes, modern multi-party flats, office buildings or commercial properties that require intelligent door communication with Wi-Fi functions and mobile-controlled access control.
