14-unit 7x2 freestanding mailbox system Design BASIC 385-9016 ST-R - RAL 9016 traffic white | RAL 9016 Traffic White, fine-textured matt | with 14 mailboxes (2x7) | 300x110x385 mm (WxHxD) - ?? Normal 12 litres

Product number 385-9016-14W

Product description

Freestanding 14-compartment mailbox system BASIC 385 for 14 households – wide, multi-column configuration – RAL 9016 Traffic White

For larger multi-family homes, residential complexes and demanding commercial properties, the freestanding BASIC 385 as a system for 14 households provides a durable and clearly arranged entrance solution. The independent stand-mounted design allows the mailbox system to be positioned to suit the plot and access situation.

The W variant distributes the mailboxes in a wider, multi-column system layout and creates a clearly arranged frontage for multiple users.

The mailboxes are made from galvanised steel and receive a powder coating in RAL 9016 Traffic White fine-textured matt. A close-fitting side cladding with a rain hood unites the individual mailboxes into a continuous overall system.

Each compartment has an insertion slot of 35 × 265 mm for DIN C4 items in portrait orientation. A sound-damping rubber lip reduces slamming noise, while the front access doors open from left to right. Each mailbox is supplied with two keys with key number and an interchangeable nameplate positioned below the insertion flap.

The advantages of the BASIC 385 at a glance

Solid stainless steel support posts

Round-tube support posts of approx. 60 mm diameter made from brushed stainless steel V2A 1.4301 provide a stable base for the freestanding mailbox system. The robust construction is designed for long-term use at the property entrance.

Large insertion to DIN EN 13724

The insertion opening of 35 × 265 mm is designed for DIN C4 items in portrait orientation. Larger envelopes can also be deposited without folding.

Quiet insertion and convenient retrieval

A sound-damping rubber lip reduces the impact of the insertion flaps. Mail is retrieved from the front via doors that open from left to right.

Bright surface in RAL 9016

RAL 9016 Traffic White fine-textured matt provides a clear, bright appearance and permanently protects the galvanised steel construction.

Proven BASIC quality Made in Germany

The combination of solid material selection, DIN EN 13724-compliant compartments and an installation-friendly construction makes the BASIC 385 a durable solution for daily use.

Equipment of the BASIC 385 mailbox system

Mailbox system

Design Wide, multi-column configuration
Number of mailboxes 14 individually usable compartments
Mailbox material Galvanised steel
Surface RAL 9016 Traffic White fine-textured matt
Rain hood / side cladding Galvanised steel, powder-coated in RAL 9016 Traffic White fine-textured matt
Manufacture Made in Germany by Briefkasten Manufaktur Lippe

Mail and operation

Insertion opening 35 × 265 mm, suitable for DIN C4 portrait
Insertion flaps With sound-damping rubber lip
Mail retrieval From the front
Door opening From left to right
Keys 2 keys with key number per mailbox
Nameplate Interchangeable nameplate below the insertion flap
Standard Mailboxes compliant with DIN EN 13724

Support posts and fittings

Support posts Round tube approx. 60 mm from stainless steel V2A 1.4301, brushed
Mounting options Optionally for bolt fixing or concreting into the ground
Fixings Anchor bolts for bolt fixing are not included; select separately to suit the foundation

Mailbox size and volume

The BASIC 385 is available with different mailbox sizes depending on the product configuration. The standard version 300 × 110 × 385 mm offers approx. 12 litres volume; depending on the variant 300 × 220 × 385 mm with approx. 25 litres volume is also available.

Installation by concreting-in

For the freestanding system we recommend a sufficiently dimensioned concrete foundation. When concreting in, the stainless steel support posts must be set plumb and permanently anchored in the foundation. Foundation size and embedment depth must be matched to soil conditions, system weight and local circumstances.

Bolt fixing to a foundation

For bolt fixing, a level and load-bearing concrete foundation is required. Suitable anchor bolts or fixings must be selected to suit the substrate and the system load. In the BASIC-385-ST-R versions, anchor bolts are not part of the standard scope of delivery.

Note on weather protection

Mail is best protected from moisture and dirt only when fully inserted and the insertion flap is closed. Protruding items may prevent the flap closing completely. In extreme weather conditions, moisture may enter the mailbox despite compliant design.

Product properties

Material	Steel, galvanised, Stainless steel V2A 1.4301
Surface/colour	RAL 9005 deep black, RAL 3004 crimson red, DB 703 iron mica, RAL 7016 anthracite grey, RAL of your choice (according to colour table), Brushed, RAL 9007 grey aluminium, RAL 9016 traffic white
Series	BASIC
Boxes by volume	Normal > 10 litres
Name labelling	Nameplate
Mounting type	Free-standing
Removal of mail	On the front
Number of boxes	with 14 letterboxes
