# Gira door communication switching actuator REG

**Product number** 128900

## Product description

## Gira door communication switching actuator REG

Switching actuator for switching lights, operating a door opener at secondary doors or other functions via the Gira door communication BUS.

- Control of a potential-free switching contact 230 V / 10 A via the 2-wire bus.
- The switching actuator can be operated via: the "Door" and "Light" buttons on the apartment station, the call button on the door station, the call button on the apartment station, the buttons of a telephone (in conjunction with the TKS-TK gateway).
- The switching actuator can be operated in five different modes: Switch, Timer/s, Timer/min, Pulse and Door opener.
- Pulse function for controlling existing staircase light timers.
- Binary input for switching functions via a connected mechanical push-button.
- Switching time, depending on the selected function, continuously adjustable from 1 to 10 s or 1 to 10 min.

### Technical data

| | |
|---|---|
| **Power supply** | via 2-wire bus |
| **Potential-free relay contact (selectable)** | 10 A at AC 230 V or 2 A at DC 30 V |
| **Number of learnable call buttons** | max. 16 |
| **Ambient temperature** | -5 °C to +45 °C |

### Notes

- The switching actuator is intended for installation in the sub-distribution board. If this is not possible, use a commercially available surface-mounted distribution enclosure.
- This component makes it possible to build door communication systems with more than 30 stations.

## Dimensions

| | |
|---|---|
| **Width in mm** | 2 TE |
| **Height in mm** | REG |
| **Depth in mm** | 65.0 |
| **Weight in kg** | 0,2 |
