Design letterbox pedestal GRIMM - rear removal - colour of your choice with COMELIT Ultra - VIDEO set | Comelit Ultra | ? Colour of your choice | Rear mail retrieval

Product number 562-STL-PE-H-SPO-1-SF-CSU

Product description

GRIMM Design Mailbox Column with Comelit Video Intercom System – Modern Technology Meets Timeless Design

The GRIMM mailbox column with rear extraction combines modern design, precise craftsmanship, and high-quality materials – ideal for builders, architects, and homeowners seeking a freestanding, elegant, and durable solution with an integrated Comelit video intercom system. Manufactured from robust stainless steel and completely "Made in Germany" by the Lippe mailbox manufactory, this column exemplifies quality, functionality, and timeless aesthetics. The powder-coated front panel made of 2 mm V2A stainless steel impresses with high corrosion resistance and a clean line that harmoniously integrates into any modern architecture.

At the forefront is the Comelit Ultra video intercom system, available in 2-wire technology or ViP (IP technology). Both systems enable comfortable, secure, and connected door communication. Through the Comelit app, visitors can be seen at any time, spoken to, and doors or gates opened if necessary – whether from home or on the go. Thus, the GRIMM mailbox column blends modern technology with optimal ease of use.

The GRIMM mailbox impresses with modern design, high-quality processing, and thoughtful functionality. Equipped with a classic stainless steel lever lock including a dust cover, the locking mechanism is reliably protected from weather influences and ensures a long service life. Mail retrieval takes place conveniently from the rear – ideal when the mailbox is integrated into a wall or fence.

The incoming mail is delivered from the front and is supported by high-quality axle dampers that allow for gentle and quiet closing of the mail slot. Thanks to the practical design, your mail remains securely in the box even when the flap is opened. Particularly flexible, the GRIMM features a double-box system: The column can be installed during the shell construction phase, while the front panel is mounted only after the construction work is completed. This protects the mailbox from dirt and damage during the construction period and ensures a perfect appearance upon moving in.

The GRIMM mailbox column meets the requirements of DIN/EN 13724 and is thus suitable for letters in size C4 – without bending or damage. Here, quality, durability, and precision are just as central as a clear, modern look.

A special feature of the GRIMM design mailbox column is the fully welded column made of solid V2A stainless steel 1.4301, powder-coated in your choice of colour. This construction guarantees maximum stability and an exceptionally long service life – even with permanent outdoor use. The fully welded design results in a seamless, robust body without visible screw or plug connections, which not only emphasizes the elegant appearance but also prevents the ingress of moisture and dirt. The precisely ground seams ensure a homogeneous appearance and lend the column a particularly high-quality look. In addition, the construction allows for invisible cable management within the column, so that all electrical connections for the COMELIT Ultra video intercom system and other smart home components can be safely and securely installed. This unique manufacturing method sets new standards in design and functionality, making the GRIMM mailbox column a future-proof solution for modern architectural projects.

- High-quality mailbox column made entirely of V2A stainless steel for freestanding installation.
- Front panel made of 2 mm V2A stainless steel 1.4301, powder-coated in desired colour.
- Quality manufacturing – Made in Germany by Lippe mailbox manufactory.
- Integrated Comelit Ultra in two modern connection variants – 2-wire technology and ViP (IP technology). Both systems impress with high flexibility, easy installation, and future-proof network integration.
- High-quality lever lock including 2 keys with key number.
- The rear access door with opening limiter opens from top to bottom to prevent your mail from falling out.
- Front mail insertion with high-quality axle dampers for very quiet mail insertion.
- DIN/EN 13724 compliant mailbox, insertion size (3.5 cm x 32.5 cm) for C4 landscape – even large letters remain intact. Additional extraction protection made of stainless steel integrated.
- Optimal weather protection due to recessed panel.
- Double box system: The panel can be easily installed after the construction work is completed and can be replaced at any time.
- The fully welded column is made of 2mm V2A stainless steel 1.4301, powder-coated in your choice of colour. Construction height is 1.70 m.
- Invisible cable feed possible through the body.
- The column is equipped with a base plate made of VA. This is 10 mm thick and is refined with a cover panel. This conceals the fastening anchors.

Important Information:

To achieve optimal water protection for your mail, the mailbox or mailbox system should ideally be located under a canopy.

Mail is only protected from water when it is completely placed in the box and the insertion flap is closed. Mail that is not fully inserted allows moisture and dirt to enter the mailbox. This system is protected against water ingress in accordance with DIN EN 13724. Water ingress is not a valid reason for complaint.

Product properties

Surface/colour	RAL 9005 deep black, RAL 3004 crimson red, DB 703 iron mica, RAL 7016 anthracite grey, RAL of your choice (according to colour table), RAL 9007 grey aluminium, RAL 9016 traffic white
Series	GRIMM
Connection technology	2-wire, LAN
Number of bell push buttons	1 button
Functions	Camera, Intercom, Fingerprint, Keypad
Functional box prepared for manufacturer	Comelit
Mounting type	Free-standing
Material	Stainless steel V2A 1.4301, Stainless steel 1.4016 (non-rusting magnetic stainless steel)
House number	House number as laser engraving
Name labelling	Laser-engraved
Number of boxes	with 1 letterbox
Boxes by volume	Large > 16 litres
Removal of mail	On the back
