# Socket column / energy column ORDO for floor mounting - CEE - Schuko - 811 mm - 6-way - single-column - RAL 9007 grey aluminium | RAL 9007 grey aluminium, fine-structure matt | 6-unit single-column

**Product number** 376-6-9007

## Product description

## Modular ORDO power socket column for freestanding installation

The modular **ORDO** socket column is a functional and durable solution for safe power supply outdoors. It is suitable for use in gardens, on terraces, at campsites, in residential complexes and in commercial or public areas. With its clear design language and robust construction, the socket column can be used in a wide range of applications.

Manufactured from **galvanised steel** and high-quality **powder-coated**, the socket column provides long-lasting protection against corrosion and weathering. An integrated rain hood offers additional protection for the sockets against direct moisture. Production takes place at Briefkasten Manufaktur in Germany and stands for precise craftsmanship and quality “Made in Germany”.

The ORDO socket column is available in **two heights**, allowing optimal adaptation to the intended area of use. The modular design enables individual configuration as well as later adjustment or expansion of the modules.

- Socket column made of galvanised steel, powder-coated in RAL 9007 grey aluminium, fine-textured matt finish.
- German quality manufacture by Briefkasten Manufaktur (“Made in Germany”).
- Integrated rain hood for protection against the elements.
- Modular design for individual configuration, e.g. with CEE or Schuko sockets, or pre-prepared modules for your own switch ranges. Further additions such as switches, push-buttons, key switches, communication connectors, industrial sockets, motion detectors, water connections, lighting etc. are available on request.
- Rear-protected socket modules with a high-quality plastic housing.
- Simple and well-thought-out installation: fix the column to the ground, wire it, slide in the front plate and secure with screws.

**Important information**

Please note that the installation of the included sockets requires professional installation by a qualified electrician.

**Note for camping, caravan and motorhome pitches**

Versions with more than 4 socket modules are not intended for use as a power supply on camping, caravan or motorhome pitches. Special requirements apply in these applications regarding socket type, overcurrent protection, residual-current protection and maximum grouping.

The specific planning, installation and testing must be carried out by a qualified electrician in accordance with the national regulations applicable at the site of use. For Germany, in particular the relevant DIN VDE standards must be observed.

## Product properties

| | |
|---|---|
| **Material** | Steel, galvanised, Stainless steel V2A 1.4301 |
| **Series** | ORDO |
| **Mounting type** | Free-standing |
| **Surface/colour** | RAL 9007 grey aluminium |

## Dimensions

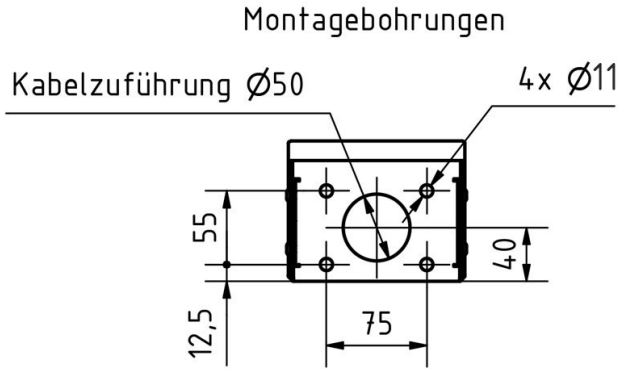

| | |
|---|---|
| **Width in mm** | 134.5 |
| **Height in mm** | 811 |
| **Total width in mm** | 134.5 |
| **Depth in mm** | 90 \| 105 |
| **Weight in kg** | 10 |
| **Delivery condition** | Delivered fully assembled. |
