Product number 562-STLPK-SPR-SF-LOX2

Product description

Design Mailbox Column GRIMM Prepared for LOXONE Intercom/Code Touch 2x1 – The Premium Solution for Mail & Packages

The Design Mailbox Column GRIMM combines modern design, high-quality processing, and maximum flexibility. Made from **2 mm stainless steel V2A 1.4301** and powder-coated in a **colour of your choice**, the column impresses with its timeless elegance and extreme robustness. Thanks to the **fully welded construction**, there are no visible screws or rivets, creating a particularly elegant appearance. The **mailbox and parcel box module** is also installed with invisible fasteners – for a premium look at the highest level.

Particularly practical: The modules can be replaced even after many years. This ensures that your mailbox column remains flexible and future-proof at all times. This model is manufactured by the **Mailbox Factory in Bad Salzuflen** – quality work "Made in Germany".

A special feature of the system is the proven mechanical parcel lock with T-handle, which allows delivery independent of the postal worker: The delivery person places the parcel in the openly accessible compartment and locks it with a simple click. The compartment remains locked until the authorised user opens it with their key. A clever solution – without electronics, without an app, but with maximum security. Whether DHL, UPS, DPD, GLS, Hermes, or TNT – any parcel service can use the parcel box. This ensures that you receive your shipments safely and conveniently at any time, even when you are not at home.

The mailbox GRIMM is not only a visual highlight but also stands out in terms of functionality and quality. Thanks to the innovative push-key lock, the mailbox can be easily and comfortably operated with one hand. Open the door with a press and close it without the use of a key. The lock is optimally protected against weather influences. Additionally, the mailbox features an intelligent retrieval system: The door opens from top to bottom, ensuring that letters remain securely in the box and cannot fall out. The mail can also be inserted conveniently from the front, with high-quality axle dampers ensuring a soft closing of the retrieval flap. The flush design allows for seamless integration of up to two LOXONE system modules (not included) via a thoughtful holding system. Preparation is provided for 1 piece LOXONE Intercom (including perforation for sound exit) + 1 piece LOXONE NFC Code Touch/Touch Pure.

Thanks to the DIN/EN 13724 standard, the GRIMM is ideally suited for large letters in the C4 format, which can be inserted without creasing. The GRIMM mailbox impresses with its durable quality, timeless design, and well-thought-out functionality.

Mailbox Module with Function Box – Comfort and Functionality

- Made from 2 mm stainless steel V2A 1.4301, powder-coated in your chosen colour.
- The LOXONE Intercom can be seamlessly integrated into the flush design and exchanged at any time. Preparation is provided for 1 piece LOXONE Intercom (including perforation for sound exit) + 1 piece LOXONE NFC Code Touch/Touch Pure. WITHOUT LOXONE Intercom/system components!
- Innovative push-key lock including 2 keys with key number, pleasant locking without a key, optimally protected against weather.
- The retrieval door with opening limiter opens from top to bottom to prevent letters from falling out.
- Front-side insertion with high-quality axle dampers for very quiet insertion of mail.
- DIN/EN 13724 compliant mailbox, insertion size (3.5 cm x 32.5 cm) for C4 landscape – even large letters remain intact. Additional retrieval protection integrated from stainless steel.
- Optimal weather protection through offset cover.
- Double box system: The cover can be easily installed after the construction work is completed and exchanged at any time.

Parcel Box Module – Secure and Generous

- Made from 2 mm stainless steel V2A 1.4301, powder-coated in your chosen colour.
- Parcel volume: 130 litres – ideal for large shipments.
- Maximum parcel size: 505 × 655 × 340 mm (W × H × D).
- Front parcel retrieval door 510 × 660 mm, opens from left to right.
- Door equipped with durable stainless steel hinges.
- Innovative T-handle parcel lock with snap closure.
- Including 2 keys with key number.
- Pictogram "PACKAGE" as stainless steel laser engraving.

Construction & Details

- Fully welded stand column made from 2 mm stainless steel V2A 1.4301, powder-coated in your chosen colour.
- Construction height: 1.70 m.
- Invisible cable routing through the body is possible.
- Base plate made of stainless steel (10 mm thick), concealed by an elegant cover strip.
- No visible screws or rivets – seamless design.
- Modules can be replaced even after years – maximum future-proofing.

Important Information:

To achieve optimal water protection for your mail, the mailbox or mailbox system should ideally be located under a canopy.

Mail is only protected from water when it is completely placed in the box and the insertion flap is closed. Mail that is not fully inserted allows moisture and dirt to enter the mailbox. This system is protected against water ingress according to DIN EN 13724. Water ingress is not a reason for complaint.

Product properties

Surface/colour	RAL 9005 deep black, RAL 3004 crimson red, DB 703 iron mica, RAL 7016 anthracite grey, RAL of your choice (according to colour table), RAL 9007 grey aluminium, RAL 9016 traffic white
Series	GRIMM
Functions	Camera, Intercom, Parcel compartment
Functional box prepared for manufacturer	LOXONE
