Security pedestal letterbox - A4 folder letterbox type 190 - polished stainless steel | Stainless steel, brushed

Product number 820

Product description

Security pillar letterbox type 190 - pillar for A4 folders - polished stainless steel

The security pillar letter box type 190 is a high-quality pillar letter box made of polished V2A stainless steel with a particularly large insertion compartment for A4 folders and large mail items. Thanks to its solid construction, precise workmanship and sophisticated security details, this letter box fulfils the highest requirements in terms of security, durability and functionality.

The security free-standing letter box type 190 is the perfect solution for professional applications with high security requirements and large volumes of mail. Thanks to its solid stainless steel construction, generous A4 folder format and sophisticated security technology, it offers reliable protection and maximum ease of use. Ideal for banks, tax consultants, car dealerships and local authorities who value quality, security and design.

Type 190 is specially designed for the secure insertion of A4 folders, large-format documents and large volumes of business mail. The insertion slot measures 315 mm × 100 mm and can therefore accommodate up to 3 - 5 A4 folders (81 × 318 × 285 mm) as well as regular letter post. This makes this security letterbox ideal for organisations that regularly receive large or confidential documents - such as banks, law firms or public administrations.

Increased security thanks to solid materials

The Type 190 free-standing letterbox impresses with its solid stainless steel construction with a material thickness of 3 mm for the pillar and a 4 mm thick cover plate. The removal door is also made of 3 mm stainless steel and is fitted with an ABUS profile cylinder. If required, the lock can be easily replaced with a profile half cylinder of your choice (e.g. for a locking system).

The insertion flap is equipped with pneumatic damping and offers reliable protection against unauthorised removal of items thanks to toothed plates and steel pins. This sophisticated system prevents tampering and ensures that even bulky items remain safely inside.

Ideal for banks, tax consultants, car dealerships and local authorities

The security free-standing letterbox type 190 is designed for all areas where large volumes of sensitive documents need to be stored securely:

- **Banks and savings banks:** secure posting of transfers, contract documents or confidential documents outside opening hours. The extra-large slot is ideal for envelopes and document folders.
- **Tax consultants and law firms:** Clients can hand in folders, contracts or accounting documents discreetly and securely. The solid stainless steel provides reliable protection against break-ins and tampering.
- **Car dealerships and garages:** Ideal for keys, vehicle documents or repair orders. The robust design ensures security even with frequent use and in public locations.
- **Municipalities and public institutions:** Perfectly suited for citizen mail, applications and official documents. The high capacity enables use as a central letterbox with permanent resistance to weathering and tampering.

Design, function and durability

The **polished stainless steel finish** ensures a timelessly elegant look that blends harmoniously into both modern and classic architecture. The concealed base mounting and clear lines give the letterbox a high-quality, prestigious appearance. Stainless steel V2A is particularly easy to clean, corrosion-resistant and guarantees a **long service life** - even outdoors.

Sustainable quality - Made in Germany

Every type 190 security letterbox is manufactured in Germany and combines **traditional craftsmanship** with **modern production technology**. The use of durable materials and resource-saving production emphasise the letterbox manufacturer's sustainable quality standards.

Technical details

- Material: V2A stainless steel, polished
- Material thickness of pillar: 3 mm stainless steel
- Cover plate: 4 mm stainless steel, polished
- Removal door: 3 mm stainless steel, opens from left to right
- Lock: ABUS profile cylinder (interchangeable, e.g. for locking systems)
- Insertion size: 315 mm × 100 mm (suitable for A4 folders up to 81 mm spine width)
- Security features: Toothed plate and steel pins to prevent unauthorised removal
- Throw-in flap: pneumatically damped
- Installation type: floor-standing with concealed base fixing (plinth panel)
- Weight: approx. 68 kg

Important information:

To achieve optimum water protection for your mail, the letterbox or letterbox system should be located under a canopy if possible.

The mail is only protected from water if it is completely placed in the box and the flap is closed. Mail that is not fully inserted allows moisture and dirt to enter the letterbox. This system is protected against the ingress of water in accordance with DIN EN 13724. Water ingress is not a reason for complaint.
