Firewood rack DROSTE with storage compartment – RAL 7016 Anthracite grey

Product number 358

Product description

Firewood rack DROSTE with storage compartment – firewood storage and storage space in a clear unit

The firewood rack DROSTE combines a generous open area for storing firewood with a separately enclosed storage compartment. This allows logs and suitable garden accessories to be accommodated within a single, cleanly designed structure.

The open area enables clear and easily accessible storage of logs. The storage compartment, located to the side, provides additional enclosed space for suitable items around the garden, terrace or firepit.

The finish in RAL 7016 anthracite grey blends particularly well into modern outdoor areas. By combining an open wood store, enclosed storage and a clear design language, DROSTE becomes not only a functional storage solution but also a deliberately designed element in the garden.

The advantages of the DROSTE firewood rack at a glance

Firewood and storage combined

DROSTE unites an open storage area for firewood with a closed storage compartment. This enables logs and suitable accessories to be stored clearly at a single location.

Generous open wood storage area

The open area provides ample space for neatly stacked firewood. The open front keeps the wood easily accessible and allows for clear storage and removal.

Separate closed storage compartment

Next to the wood store there is a closed storage area. Here, suitable garden tools, gloves, firelighting accessories or other items can be stored tidily out of sight.

X-struts for side stabilisation

The diagonally arranged X-struts support the lateral stability of the structure and at the same time shape the technical appearance of the open storage area.

RAL 7016 anthracite grey

The anthracite-grey finish gives DROSTE a modern and understated appearance. The firewood rack can therefore be combined particularly well with contemporary architecture, terraces and other anthracite-coloured elements outdoors.

Equipment of the DROSTE firewood rack

Wood storage and construction

Version Firewood rack with integrated storage compartment
Wood storage Open storage area for firewood
Side stabilisation Diagonally arranged X-struts
Finish RAL 7016 anthracite grey
Application Garden, terrace and outdoor areas

Storage compartment and use

Storage compartment Separate closed storage area
Access Front access via separate door
Suitable for Suitable garden and fireplace accessories
Log stacking Even and stable within the side boundaries
Capacity Adapt to installation location, safe stacking and local conditions

Assembly and installation

Base Level and permanently load-bearing
Floor fixing To be adapted to the substrate and local conditions
Wall fixing To be performed in accordance with the assembly instructions and the installation situation
Assembly Assembly kit for self-assembly
Instructions Assembly and operating instructions included

Note on storage of firewood

Firewood must be stacked evenly and in a stable manner. The side limits of the rack must not be exceeded. The X-struts serve solely for the lateral stabilisation of the structure and are not designed as a retaining device for loose or rolling logs.

Note on capacity

The capacity of the firewood rack must be adjusted to local conditions, the installation location and a safe, even stacking. No general maximum total load is specified for this version.

Note on fixings

The firewood rack must be placed on a level and sufficiently load-bearing surface. Floor and, if applicable, wall fixings must be selected according to the respective substrate and the specific installation circumstances and carried out professionally.

Note on fire and heat

No embers, hot ash, flammable liquids or gas cylinders may be stored in the rack. The product is not intended as a fire pit and should not be placed directly next to barbecues, open fires or heating appliances.

Product properties

Material	Steel, galvanised
Series	DROSTE
Mounting type	Free-standing
Surface/colour	RAL 7016 anthracite grey
