COMELIT IP home station Video Maxi with 7-inch screen white | Surface-mounted

Product number 1299-6802W-AP

Product description

COMELIT IP home station Video Maxi with 7" screen white

Indoor station Video Maxi (VIP) in white for flush mounting (with housing art. 6817) or surface mounting (with bracket art. 6820), 7" touchscreen 16/9 and hands-free function full duplex. Allows adjustment of the backlighting, contrast control and setting of the speech connection volume and ringtone. Equipped as standard with sensitive touch buttons for door opening, speech connection, self-activation, ring tone deactivation and 2 further programmable function buttons, LED indicators for open door and new messages. Manages storey call and call repetition as standard, has panic and alarm input and a slot for a micro SD card. Ringtone and video memory function with absence message can be personalised. Can also be used in standard PoE systems. Dimensions: 223x124x25mm.

The VIP system is the evolution of video intercom systems and associated services. The services fulfil all modern requirements of buildings used for residential, commercial, industrial and industry-related service providers: from single-family homes to building complexes, both new buildings and conversions or renovations of old buildings. It is designed to connect an unlimited number of subscribers and allows simultaneous calls without distance restrictions. The devices are connected to a single, dedicated or existing network via RJ45. In the ViP system, all devices are connected to the (dedicated or shared) LAN network, from the external station to the most remote internal station. Compared to traditional analogue video intercom systems, the digital network protocol makes it easy to configure the system without costly or complex measures, and even system updates are extremely versatile and practical. Installation, commissioning and reconfiguration can be carried out easily and completely securely in the network.

Important information

Camera or intercom preparation

The intercom systems must be connected by an electrician. Contact your trusted electrician for planning, fitting and installation.
