6-unit freestanding mailbox Design BASIC 385-7016 ST-R with bell box - RAL 7016 anthracite grey | RAL 7016 Anthracite grey, fine texture, matt | Left | with 6 letterboxes

Product number 385-7016-6W-SP-L

Product description

Freestanding 6-unit mailbox system BASIC 385 for 6 households – wide, multi-column configuration with bell/intercom unit – bell panel left – RAL 7016 Anthracite grey

The BASIC 385 is designed as a freestanding mailbox solution for 6 households. Robust materials, front access and the freedom to choose the location make the system particularly suitable for apartment buildings, smaller residential complexes as well as office and medical practise properties.

The W configuration distributes the mail compartments in a wider, multi-column layout and creates a clear front for multiple users.

The mailboxes are made of galvanised steel and powder-coated in RAL 7016 Anthracite grey with a fine-textured matt finish. A close-fitting side cladding with rain canopy unites the individual mailboxes into a single continuous unit.

Each compartment features an aperture of 35 × 265 mm for DIN-C4 items in portrait format. A noise-damping rubber lip reduces impact noise, while the front access doors open from left to right. Each mailbox is supplied with two keys carrying a key number and an interchangeable nameplate below the flap.

The integrated bell/intercom unit on the left combines the doorbell function and preparation for an intercom system directly within the mailbox system.

The advantages of the BASIC 385 at a glance

Solid stainless-steel support posts

Round-tube support posts with approx. 60 mm diameter in brushed stainless steel V2A 1.4301 form a stable base for the freestanding mailbox system. The robust construction is designed for permanent use at the property entrance.

Large aperture to DIN EN 13724

The aperture of 35 × 265 mm is designed for DIN C4 items in portrait format. Even larger envelopes can be inserted without folding.

Quiet insertion and convenient retrieval

A noise-damping rubber lip reduces the slamming of the flap. Mail is retrieved from the front via doors that open from left to right.

Durable finish in RAL 7016

The matte fine-textured surface in anthracite grey combines a modern appearance with a resilient coating on the galvanised steel.

Bell/intercom unit directly integrated

The bell/intercom panel on the left is integrated directly into the mailbox system.

Equipment of the BASIC 385 mailbox system

Mailbox system

Design Wide, multi-column configuration
Number of mailboxes 6 individually accessible compartments
Material of mailboxes Galvanised steel
Finish RAL 7016 Anthracite grey, fine-textured matt
Rain canopy / side cladding Galvanised steel, powder-coated in RAL 7016 Anthracite grey, fine-textured matt
Manufacture Made in Germany by Briefkasten Manufaktur Lippe

Mail and operation

Aperture 35 × 265 mm, suitable for DIN C4 in portrait format
Flaps With noise-damping rubber lip
Mail retrieval From the front
Door opening From left to right
Keys 2 keys with key number per mailbox
Nameplate Interchangeable nameplate below the flap
Standard Mailboxes in accordance with DIN EN 13724

Support posts and equipment

Support posts Round tube approx. 60 mm made of stainless steel V2A 1.4301, brushed
Mounting options Available for bolted mounting or embedding in concrete
Fixings Anchor bolts for bolted mounting not included; select appropriate anchors for the foundation separately
Bell/intercom unit Integrated functional panel, position: left
Intercom preparation Speech perforation with universal adapter for standard built-in speakers
Doorbell button Round stainless-steel bell push matching the product design

Mailbox size and volume

The BASIC 385 is available with different mailbox sizes depending on the product configuration. The standard version 300 × 110 × 385 mm offers approx. 12 litres volume; depending on the variant, 300 × 220 × 385 mm with approx. 25 litres volume is also available.

Installation by embedding in concrete

For the freestanding system we recommend a suitably dimensioned concrete foundation. When embedding, the stainless-steel support posts must be set vertically and permanently anchored in the foundation. Foundation size and embedment depth should be adapted to the ground conditions, system weight and local requirements.

Bolted mounting on a foundation

For bolted mounting a level and load-bearing concrete foundation is required. Suitable anchor bolts or fixings must be selected to match the substrate and the system load. For the BASIC-385-ST-R variants anchor bolts are not included in the standard scope of delivery.

Note on weather protection

Mail is best protected from moisture and dirt when fully inserted and the flap is closed. Protruding items can prevent the flap from closing completely. Under extreme weather conditions, moisture may enter the mailbox despite compliant design.

Note on bell and intercom technology

The bell/intercom unit is prepared with speech perforation and a universal adapter for common built-in speakers. Two-way intercom systems or built-in speakers are not included in the standard equipment. Planning, connection and commissioning of electrical components should be carried out by a qualified electrician.

Product properties

Material	Steel, galvanised, Stainless steel V2A 1.4301
Series	BASIC
Number of bell push buttons	6 buttons
Functions	Light button, Intercom
Functional box prepared for manufacturer	GIRA, Busch Jaeger, Siedle, STR Elektronik, ELCOM, TCS, Ritto, ALGO, Telegärtner, Auerswald, Legrand Bticino, Comelit
Number of boxes	with 6 letterboxes
Boxes by volume	Normal > 10 litres
Name labelling	Nameplate
Mounting type	Free-standing
Surface/colour	RAL 7016 anthracite grey
Removal of mail	On the front
