Product number 215-UP-1-SPS-KSAGI106-R

Product description

Designer flush-mounted mailbox GOETHE UP, side-mounted, with GIRA System 106 - RAL colour of your choice - AUDIO complete set

High-quality flush-mounted mailbox with seamlessly integrated GIRA System 106 in a flush-fit design. The modern GOETHE mailbox is ideal for the discerning entrance area. The streamlined design without a visible lock gives this mailbox a particularly elegant appearance. 3 GIRA System modules are included, so the mailbox can be used immediately. The matching GIRA apartment station and the control unit to complete this mailbox are supplied. The modules can be exchanged later at will via the simple retaining system.

The dimensions of the single box provide a capacity of approx. 16 litres; the large letter slot also ensures that DIN-C4 envelopes and magazines, or post accumulated during an absence of several days, are not creased. The innovative Push-Key lock is concealed invisibly inside the mailbox. The key is simply inserted into the existing opening (no turning required) and the door opens. With the position of the lock, this mailbox is designed so that the retrieval door prevents your mail from falling out towards you. Thanks to the drip edge, the mail inside is optimally protected from the weather. The letter flap is fitted with high-quality hinge dampers, ensuring a quiet closing and preventing annoying rattling caused by weather influences.

The mailbox systems of the GOETHE collection are characterised by the consistent use of stainless steel. The result is very high durability and sustainability. The construction has been developed by our own engineers with a view to high flexibility and modularity, simple spare-part replacement and uncomplicated self-installation. Spare parts for all GOETHE systems are available directly in our shop.

Thanks to the design, self-installation is straightforward.

Protected utility model according to DPMA file number DE: 20 2021 101 679.5

- Flush-mounted mailbox made entirely of stainless steel.
- Quality manufacturing - Made in Germany by Briefkasten Manufaktur Lippe.
- Mailbox (W x H 400 x 400 mm) made of stainless steel 1.4016 (non-rusting magnetic stainless steel), powder-coated in a RAL colour of your choice.
- Innovative Push-Key lock with 2 keys.
- Letters are inserted and retrieved from the front. Letter flap with high-quality hinge dampers for very quiet insertion of post.
- The mailbox complies with DIN/EN 13724. Insertion size (3.5 cm x 36.0 cm) for C4 landscape; large letters fit in without creasing.
- The retrieval door opens from top to bottom. This prevents your mail from falling out towards you.
- Optionally available with house number and name engraving, laser-engraved.
- Functional box (W x H 400 x 200 mm) made of stainless steel 1.4016 (non-rusting magnetic stainless steel), powder-coated in a RAL colour of your choice.
- Doorbell nameplate in stainless steel, powder-coated in RAL colour. For better recognisability a bell symbol is laser-engraved on the nameplate.
- Plaster cover frame made from stainless steel angle profile 25 x 58 mm, powder-coated in RAL colour.
- Includes GIRA apartment station & control unit supplied, System 106 door station module installed.

GIRA

Door station module GIRA System 106 - 5565 920, installed without wiring

- Compact audio module with integrated call button for communication between inside and outside.
- A high-quality microphone and a weatherproof loudspeaker ensure good intelligibility.
- Power supply via 2-wire bus. Additional connection for central locking (ZV) (e.g. required from the 3rd camera module).
- All other System 106 modules (except the audio module) are powered via the door station module.

Surface-mounted apartment station GIRA 1250XX, supplied

- Completely pre-assembled surface-mounted apartment station, allowing quick and tidy installation.
- Design variety through integration into the switch programme, creating a consistent appearance for door communication and electrical installation.
- Mounting possible with or without cover frame.
- Easy installation using pluggable screw terminals on the mounting plate. The electrical connection to the apartment station is made when the station is mounted onto the mounting plate.
- Easy removal of the apartment station during renovation work.
- Fixing holes for mounting.
- Signal transmission and power supply to the apartment station via a polarity-protected and short-circuit-proof 2-wire bus.
- Parallel connection of up to three apartment stations possible (when powered via 2-wire bus).
- One-person commissioning via a simple start-up procedure.
- Distinct ringtones for door call, internal call and floor call.
- Selection of five different ringtones, which can be assigned individually to the call buttons.
- Hands-free function (voice-activated two-way speech with echo and background-noise suppression).
- Override function to compensate for loud ambient noise during a speech connection.
- Privacy lock.
- Control buttons with integrated LEDs for status indication.

Audio control unit REG GIRA 128700, supplied

- Supply for the polarity-protected and short-circuit-proof 2-wire bus.
- Self-resetting electronic short-circuit and overload detection of the operating voltages and the bus connection.
- Buttons for system and door-opener programming.
- LED status indicators for operation, overload, system programming and door-opener programming.
- AC 12 V output to power a standard door opener.
- Permanent AC 12 V output to supply a TKS-TK gateway.
- Relay output for switching a door opener with its own power supply.
- Door opener switching time continuously adjustable from 1 to 10 s.

Important information

Preparation for camera or intercom stations

The intercom systems must be connected by an electrician. For planning, installation and commissioning, please contact the electrician of your choice.

Water protection

To achieve optimal water protection for your post, the mailbox or mailbox system should, if possible, be located under a canopy.

Mail is only protected from water if it is placed completely inside the box and the letter flap is closed. Mail that is not fully inserted allows moisture and dirt to enter the mailbox. This installation is protected against water ingress according to DIN EN 13724. Water ingress is not grounds for a complaint.
