Gira video distributor 122600

Product number 122600

Product description

Gira video distributor

The video distributor is an active component for line adaptation of the video signal. The video distributor distributes the video signal from the door stations, DCS-camera gateways and DCS-IP-gateways to the home stations. The video distributor is required if the cable routing to the video components of the Gira door communication system is implemented as a stub line. The video distributor provides the correct terminating resistance to prevent possible reflections from the individual branches and the resulting image interference.

The combination housing enables three types of installation

- Surface-mounted (in a standard junction box).
- Flush-mounted (in an appliance box).
- As a REG device (with the enclosed REG adapter).

Technical data

Power supply

DC 26 V ± 2 V (via 2-wire bus)

Connections

2-wire bus IN: 2 x screw terminal
2-wire bus OUT: 6 x screw terminal

Ambient temperature: -25 °C to +70 °C

Notes

- The video distributor can be cascaded. A total of up to 15 video distributors including video multiplexers can be used in one system.
- No further configuration is required during commissioning, as the video distributor automatically adapts to the existing cable network.

Dimensions

Width in mm	36
Height in mm	52
Depth in mm	27,0
Weight in kg	0,2
