13-unit freestanding letterbox Design BASIC 385P-9016 ST-T with doorbell box - RAL 9016 traffic white | RAL 9016 Traffic White, fine-textured matt | Right | with 13 mailboxes

Product number 385P-9016-13S-SP-R

Product description

Freestanding mailbox system BASIC 385P with bell/intercom module on the right for 13 units – RAL 9016 Traffic White – narrow version

The freestanding BASIC 385P mailbox system for 13 units combines 13 separately usable mail compartments with an integrated bell function box. This unites mail reception, doorbell buttons and the provision for compatible door intercom technology in a robust, visually closed entrance solution for large residential complexes, multi-occupancy properties and commercially used buildings. In this variant, the bell/intercom module is positioned to the right of the mailbox system.

The mailboxes are made of galvanised steel and are powder-coated in RAL 9016 Traffic White with a fine-structure matt finish. A close-fitting side cladding with rain hood and integrated rain gutters support weather protection. The solidly manufactured stand elements made from anodised aluminium profile are also powder-coated in RAL 9016 Traffic White and form a particularly stable, durable base for the freestanding unit.

Each of the 13 compartments has approx. 12 litres of volume. The 35 × 265 mm insertion aperture is designed for DIN C4 items in portrait format. A noise-damping rubber lip reduces the impact of the flap. Mail is retrieved from the front; the retrieval doors open from left to right. Each mailbox is supplied with two numbered keys and an interchangeable name plate located under the insertion flap.

Advantages of the BASIC 385P mailbox system at a glance

Integrated bell function box on the right

The unit combines 13 mailboxes with 13 stainless-steel doorbell buttons and a speaker aperture with a universal adapter. This creates a central, tidy solution for mail and visitor communication.

Solid aluminium stand elements

Solidly manufactured, anodised aluminium profiles form the stable base of the freestanding system. The powder-coated construction combines high load capacity with a durable design for outdoor use.

DIN C4 aperture with 12-litre volume

The mailboxes each offer approx. 12 litres of mail volume. The 35 × 265 mm insertion aperture accepts DIN C4 items in portrait format without larger envelopes needing to be unnecessarily folded.

Prepared for door communication

The speaker aperture with universal adapter is prepared for many commercially available flush-fit speakers.

Robust BASIC quality in RAL 9016 Traffic White

Galvanised steel, stainless-steel components, solid aluminium stand elements and German manufacturing result in a resilient mailbox system for long-term use at property entrances.

Equipment of the BASIC 385P mailbox system

Mailbox system

Number of mailboxes 13 separately usable mail compartments
Mailbox dimensions 300 × 110 × 385 mm (W × H × D) per compartment
Mail volume Approx. 12 litres per mailbox
Material Galvanised steel; side cladding and rain hood made of stainless steel V2A
Finish RAL 9016 Traffic White fine-structure matt
Insertion aperture 35 × 265 mm, suitable for DIN C4 portrait
Standard Mailboxes conforming to DIN EN 13724

Bell and intercom unit

Bell function box Galvanised steel, powder-coated to match
Position Right
Doorbell buttons 13 round stainless-steel doorbell buttons Type 4
Speaker aperture With universal adapter for commercially available flush-fit speakers
Name plate Designed to be resistant to indentation and impact

Solid aluminium stand elements

Stand elements Solidly manufactured, anodised aluminium profile
Coating Powder-coated in RAL 9016 Traffic White
Installation methods Optional screw fixing or concreting-in
Screw mounting Stand elements selectable in 1200 or 1600 mm
Concreting-in Stand elements selectable in 1600 or 2000 mm
Delivery condition Stand elements and mailbox system supplied split for assembly
Manufacture Made in Germany by Briefkasten Manufaktur Lippe

Note on the bell/intercom module

The universal adapter is suitable for many commercially available flush-fit speakers. Intercom systems or flush-fit speakers, power supply and cabling are not part of the described basic equipment and must be provided to suit the planned system.

Installation on a foundation

For screw mounting, a level and adequately load-bearing foundation is required. Fasteners must be selected to suit the foundation, system weight and local installation conditions.

Installation by concreting in

For the concreting-in version, the extended aluminium stand elements are anchored plumb in a sufficiently dimensioned concrete foundation. Foundation size and embedment depth must be matched to ground conditions, system dimensions and local loads.

Note on weather protection

The rain hood, close-fitting side cladding and integrated rain gutters support weather protection. Mail items must be fully inserted so that the flaps can close completely. Under extreme weather conditions, small amounts of moisture may penetrate despite standards-compliant construction.

Product properties

Material	Steel, galvanised, Aluminium AlMg3 W19, Stainless steel V2A 1.4301
Series	BASIC
Functions	Light button, Intercom
Functional box prepared for manufacturer	GIRA, Busch Jaeger, Siedle, STR Elektronik, ELCOM, TCS, Ritto, ALGO, Telegärtner, Auerswald, Legrand Bticino, Comelit
Boxes by volume	Normal > 10 litres
Name labelling	Nameplate
Mounting type	Free-standing
Removal of mail	On the front
Surface/colour	RAL 9016 traffic white
Number of boxes	with 13 letterboxes
