Freestanding letterbox STORM for 2 households – single-column – RAL 7016 anthracite grey | RAL 7016 Anthracite grey, fine texture, matt | with 2 letterboxes (1x2)

Product number 480STQ-2S-7016

Product description

Freestanding STORM mailbox system for 2 households – ideal for narrow property entrances

The STORM freestanding mailbox system for two households combines a clear, modern design with very high quality materials and workmanship. The two mailboxes are arranged one above the other, keeping the unit slim and making it particularly suitable for property entrances with limited width. The system is designed as a durable entrance solution for residential and commercial properties and is manufactured at the Briefkasten Manufaktur in Germany.

The mailboxes, the rain hood and the side cladding are made from **high-quality galvanised steel** and are **powder-coated in RAL 7016 Anthracite grey, fine-textured matt**. Complementing these is the **40 × 40 mm support posts in stainless steel V2A 1.4301, brushed**, creating a deliberately high-quality material contrast. The combination of the fine-textured anthracite-grey surface and brushed stainless steel defines the quality character of the STORM range.

Each mailbox features a 35 × 340 mm mail slot for DIN C4 mail in landscape format. Noise-damping rubber buffers, a downward-opening retrieval door with opening stop, a mail retention bracket and two keys with key number per mailbox ensure comfortable use. The mailboxes conform to DIN EN 13724.

The advantages of the STORM freestanding mailbox system at a glance

Ideal for two-family homes

Two separate, lockable mailboxes make this STORM system a high-quality solution for two-family houses, self-contained flats and smaller properties with two occupancy units. Manufacture in Germany, standard-compliant mailboxes and the high-quality materials are at the forefront.

Very high material quality of the mailboxes

All two mailboxes as well as the rain hood and side cladding are manufactured from galvanised steel. The powder coating in RAL 7016 Anthracite grey, fine-textured matt creates a high-quality, homogeneous surface and emphasises the straightforward architecture of the system.

High-quality support posts in brushed stainless steel

The 40 × 40 mm support posts are made from stainless steel V2A 1.4301 and receive a brushed finish. The high-quality stainless steel forms the robust base of the system and provides a deliberately noble contrast to the anthracite-grey mailbox surface.

DIN C4 slot and comfortable mail retrieval

All mailboxes have a 35 × 340 mm slot for DIN C4 envelopes in landscape format. Rubber buffers reduce impact noise; the opening stop and mail retention bracket support comfortable retrieval.

Freestanding and flexible to plan

The slim freestanding unit can be positioned independently of the façade and either concreted in or bolted to a suitable foundation. For bolted installation, the appropriate anchor bolts must be selected separately according to the foundation and local installation conditions.

Equipment and high-quality materials

Mailbox and surface

Number of mailboxes 2 separately lockable mailboxes
Arrangement 1 column × 2 rows
Mailbox material Steel, galvanised
Mailbox finish RAL 7016 Anthracite grey, fine-textured matt, powder-coated
Rain hood and side cladding Galvanised steel, RAL 7016 Anthracite grey, fine-textured matt
Standard Mailboxes conforming to DIN EN 13724

Mail convenience

Mail slot 35 × 340 mm per mailbox, suitable for DIN C4 landscape
Insertion flaps With high-quality, noise-damping rubber buffers
Mail retrieval Front-facing, door opens downward with opening stop
Mail retention bracket Integrated in each mailbox
Keys 4 keys in total, 2 per mailbox, with key number
Nameplates 2 protected interchangeable nameplates beneath the insertion flaps

Support posts and installation

Support post material Stainless steel V2A 1.4301
Cross-section 40 × 40 mm
Support post finish Brushed stainless steel
Types of installation Either for concreting in or for screw mounting
Anchor bolts Not included for screw mounting; to be selected separately to suit the foundation

Manufacture Made in Germany by Briefkasten Manufaktur Lippe

Installation by concreting in

The stainless steel support posts must be anchored plumb in a sufficiently dimensioned foundation. Foundation size and design must be adapted to ground conditions, system weight and local loads.

Screw mounting on a foundation

For screw mounting a level and load-bearing foundation is required. The required anchor bolts are not included and must be selected separately to suit the existing foundation design.

Note on weather protection

For optimal protection, mail items must be fully inserted so that the insertion flaps can close completely. A sheltered location additionally reduces direct exposure to the elements.

Product properties

Material	Steel, galvanised
Series	STORM
Boxes by volume	Normal > 10 litres
Mounting type	Free-standing
House number	House number as laser engraving
Surface/colour	RAL 7016 anthracite grey
Number of boxes	with 2 letterboxes
Name labelling	Laser-engraved
Removal of mail	On the front
