Security free-standing letterbox - Stele - A4 folder letterbox type 190 - RAL of your choice | ? Colour of your choice

Product number 820-VAR

Product description

Security pillar letterbox - A4 folder letterbox type 190 - RAL colour of your choice

The security pillar letter box type 190 is a high-quality pillar letter box made of powder-coated stainless steel V2A, developed for professional use in security-relevant areas. With its extra-large insertion compartment for A4 folders and large mail items, it offers an exceptionally high capacity - ideal for companies and institutions that regularly receive mail and documents. Thanks to its solid stainless steel construction, precise workmanship and sophisticated security technology, the Type 190 fulfils the highest requirements in terms of security, durability and functionality. The sturdy design and the protected insertion mechanism ensure that confidential documents are reliably protected against tampering and unauthorised access.

The generous insertion slot (315 mm × 100 mm) is specially designed for the secure insertion of A4 folders, large-format documents and large volumes of business mail. Up to three to five A4 folders (81 × 318 × 285 mm) can be conveniently inserted - without compromising security. This makes this letterbox ideal for banks, tax consultants, law firms, car dealerships and public administrations that need a secure yet practical solution for their daily incoming mail.

As a prestigious pedestal made of powder-coated stainless steel, the type 190 combines functional design with technical precision - a long-lasting solution for anyone who values quality, security and a professional appearance.

Increased security thanks to solid materials

The Type 190 free-standing letterbox impresses with its solid stainless steel construction with a material thickness of 3 mm for the pillar and a 4 mm thick cover plate. The removal door is also made of 3 mm stainless steel and is fitted with an ABUS profile cylinder. If required, the lock can be easily replaced with a profile half cylinder of your choice (e.g. for a locking system).

The insertion flap is equipped with pneumatic damping and offers reliable protection against unauthorised removal of items thanks to toothed plates and steel pins. This sophisticated system prevents tampering and ensures that even bulky items remain safely inside.

Ideal for banks, tax consultants, car dealerships and local authorities

The security free-standing letterbox type 190 is designed for all areas where large volumes of sensitive documents need to be stored securely:

- **Banks and savings banks:** secure posting of transfers, contract documents or confidential documents outside opening hours. The extra-large slot is ideal for envelopes and document folders.
- **Tax consultants and law firms:** Clients can hand in folders, contracts or accounting documents discreetly and securely. The solid stainless steel provides reliable protection against break-ins and tampering.
- **Car dealerships and garages:** Ideal for keys, vehicle documents or repair orders. The robust design ensures security even with frequent use and in public locations.
- **Municipalities and public institutions:** Perfectly suited for citizen mail, applications and official documents. The high capacity enables use as a central letterbox with permanent resistance to weathering and tampering.

Design, function and durability

The **polished stainless steel finish** ensures a timelessly elegant look that blends harmoniously into both modern and classic architecture. The concealed base mounting and clear lines give the letterbox a high-quality, prestigious appearance. Stainless steel V2A is particularly easy to clean, corrosion-resistant and guarantees a **long service life** - even outdoors.

Sustainable quality - Made in Germany

Every type 190 security letterbox is manufactured in Germany and combines **traditional craftsmanship** with **modern production technology**. The use of durable materials and resource-saving production emphasise the letterbox manufacturer's sustainable quality standards.

Technical details

- Material: V2A stainless steel, powder-coated in the colour of your choice
- Material thickness of pillar: 3 mm stainless steel
- Cover plate: 4 mm stainless steel
- Removal door: 3 mm stainless steel, opens from left to right
- Lock: ABUS profile cylinder (interchangeable, e.g. for locking systems)

The mail is only protected from water if it is completely placed in the box and the flap is closed. Mail that is not fully inserted allows moisture and dirt to enter the letterbox. This system is protected against the ingress of water in accordance with DIN EN 13724. Water ingress is not a reason for complaint.
