16-unit freestanding mailbox system Design BASIC 385P-7016 ST-T - RAL 7016 anthracite grey | RAL 7016 Anthracite grey, fine texture, matt | 300x110x385 mm (WxHxD) - ?? Normal 12 litres | with 16 mailboxes

Product number 385P-7016-16W

Product description

Freestanding mailbox system BASIC 385P for 16 tenants – RAL 7016 Anthracite grey – wide version

The freestanding BASIC 385P mailbox system for 16 tenants is designed for large residential complexes, multi-occupancy properties and commercial real estate. Sixteen separately lockable mail compartments are combined in a wide multi-column arrangement to form a stable, clearly arranged overall system. The free-standing installation allows a conveniently accessible position independently of the building façade.

The mailboxes are made from galvanised steel and are powder-coated in RAL 7016 Anthracite grey with a fine-textured matt finish. A close-fitting side cladding with rain hood and integrated rain drainage channels support weather protection. The solidly manufactured upright posts made from anodised aluminium profile are also powder-coated in RAL 7016 Anthracite grey and form an especially stable, long-lasting base for the freestanding system.

Each of the 16 compartments has approx. 12 litres capacity. The 35 × 265 mm insertion opening is designed for DIN C4 items in portrait format. A noise-dampening rubber lip reduces the impact of the insertion flap. Mail is collected from the front; the collection doors open from left to right. Each mailbox is supplied with two keys with key numbers and a replaceable nameplate below the insertion flap.

The advantages of the BASIC 385P mailbox system at a glance

Solid aluminium upright posts

Solidly manufactured, anodised aluminium profiles form the stable base of the freestanding system. The powder-coated construction combines high load capacity with a durable finish for outdoor use.

DIN C4 insertion with 12 litres capacity

Each mailbox offers approx. 12 litres of mail capacity. The 35 × 265 mm insertion opening accepts DIN C4 items in portrait format without larger envelopes needing to be unnecessarily folded.

Quiet insertion and reliable operation

Rubber lips dampen the insertion flaps. Robust locks, two keys per compartment and protected replaceable nameplates are designed for daily use in multi-occupancy properties.

Bolted mounting or concreting-in

Depending on the chosen version, the aluminium upright posts are bolted to a load-bearing foundation or permanently concreted in. This allows the system to be mounted to suit the structural situation.

Robust BASIC quality in RAL 7016 Anthracite grey

Galvanised steel, stainless steel components, solid aluminium upright posts and German manufacture create a resilient mailbox system for permanent use at property entrances.

Equipment of the BASIC 385P mailbox system

Mailbox system

Number of mailboxes 16 separately usable compartments
Mailbox dimensions 300 × 110 × 385 mm (W × H × D) per compartment
Mail volume Approx. 12 litres per mailbox
Material Galvanised steel; side cladding and rain hood in stainless steel V2A
Finish RAL 7016 Anthracite grey fine-textured matt
Insertion opening 35 × 265 mm, suitable for DIN C4 portrait
Standard Mailboxes conforming to DIN EN 13724

Mail and operation

Insertion flaps With noise-dampening rubber lip
Mail collection From the front
Door opening From left to right
Keys 32 keys in total, 2 per mailbox
Nameplates 16 replaceable nameplates below the insertion flaps
Rain drainage Integrated rain drainage channels

Solid aluminium upright posts

Posts Solidly manufactured, anodised aluminium profile
Coating Powder-coated in RAL 7016 Anthracite grey
Mounting options Either bolted mounting or concreting-in
Bolted mounting Posts selectable in 1200 or 1600 mm
Concreting-in Posts selectable in 1600 or 2000 mm
Delivery condition Posts and mailbox system delivered split for assembly
Manufacture Made in Germany by Briefkasten Manufaktur Lippe

Installation on a foundation

For bolted mounting a level and sufficiently load-bearing foundation is required. Fasteners must be selected to suit the foundation, system weight and the local installation situation.

Installation by concreting-in

For the concreting-in version the extended aluminium posts are set plumb into a suitably dimensioned concrete foundation. Foundation size and embedment depth should be matched to ground conditions, system dimensions and local loads.

Note on weather protection

The rain hood, close-fitting side cladding and rain drainage channels support weather protection. Mail items must be fully inserted so that the insertion flaps can close completely. Under extreme weather conditions slight moisture ingress may occur despite standard-compliant design.

Product properties

Material	Steel, galvanised, Aluminium AlMg3 W19, Stainless steel V2A 1.4301
Series	BASIC
Boxes by volume	Normal > 10 litres
Number of boxes	with 16 letterboxes
Name labelling	Nameplate
Mounting type	Free-standing
Surface/colour	RAL 7016 anthracite grey
Removal of mail	On the front

Dimensions

Height in mm	1
Height of single box in mm	110.0
Width of single box in mm	300.0
Capacity in litres	12
Height of letterbox slot in mm	35.0
Width of letter slot in mm	265.0
Height of letterbox in mm	880.0
Width of letterbox system in mm	600.0
Overall height in mm	1200.0 | 1600.0
Total width in mm	680.0
Depth in mm	435.0
Weight in kg	88
Delivery condition	Delivery is made in sections; freestanding elements / mailbox delivered in separate parts.
