Design Mailbox Parcel Column GRIMM - Colour to Choose with Preparation for Camera and Intercom on the Right | Right | Individualised preparation | ? Colour of your choice

Product number 562-STLPK-SPR-SF-IND

Product description

Design Mailbox Parcel Column GRIMM with Preparation for Camera and Intercom – The Premium Solution for Mail & Parcels

The Mailbox Parcel Column GRIMM combines modern design with first-class workmanship – ideal for discerning builders and architects seeking an elegant solution for the integration of a camera and built-in speaker. Thanks to the **fully welded construction**, there are no visible screws or rivets, resulting in a particularly refined appearance. The **mailbox and parcel box module** is also installed with invisible fastening – for a premium look at the highest level.

Especially practical: The modules can be exchanged even after many years. This ensures that your mailbox parcel column remains flexible and future-proof at all times. This model is manufactured by the **Mailbox Manufacture in Bad Salzuflen** – quality workmanship “Made in Germany”.

A special feature of this unit is the proven mechanical parcel lock with T-handle, which enables delivery independent of the sender: The courier places the parcel in the openly accessible compartment and secures it with a simple click. The compartment remains locked until the authorised user opens it with their key. A clever solution – without electronics, without an app, but with maximum security. Whether DHL, UPS, DPD, GLS, Hermes or TNT – any parcel service can use the parcel box. This allows you to receive your shipments securely and conveniently at any time, even when you are not at home.

The mailbox GRIMM is not only an optical highlight, but also stands out in terms of functionality and quality. Thanks to the innovative push-key lock, the mailbox can be easily and comfortably operated with one hand. Open the door with a press and close the door without the need for a key. The lock is also optimally protected against weather conditions. Additionally, the mailbox features an intelligent retrieval system: The door opens from top to bottom, ensuring that the mail remains safely inside the box and cannot fall out. The insertion is also comfortable from the front, with high-quality axle dampers ensuring a gentle closing of the insertion flap.

 Compatible with common manufacturers: LOXONE, Siedle, Busch-Jaeger, Gira, TCS, Legrand BTicino, Ritto, STR Elektronik, ELCOM, HHG, Comelit, Mobotix, HIKVISION and many more available upon request.

The **preparation for a camera** (not included) provides a secure foundation for modern video surveillance directly at the entrance. A **preparation for built-in speakers** is also possible – upon request with a suitable universal adapter for various intercom stations. This allows the mailbox to adapt perfectly to your existing technology.

Thanks to the DIN/EN 13724 standard, the GRIMM is ideal for large letters in C4 format, which can be inserted without creases. The mailbox GRIMM impresses with its durable quality, timeless design, and thoughtful functionality.

Mailbox Module with Function Box – Comfort and Functionality

- Manufactured from 2 mm stainless steel V2A 1.4301, powder-coated in your desired colour.
- The Gira System 106 can be seamlessly integrated into the flush design. The preparation is designed for 3 GIRA 106 system modules. The modules can be flush installed with the simple holding system (surface-mounted housing 5503910 required!). WITHOUT GIRA system components!
- Innovative push-key lock including 2 keys with key number, pleasant locking without a key, optimal protection against weather.
- The retrieval door with opening limiter opens from top to bottom to prevent the mail from falling out.
- Front insertion with high-quality axle dampers for very quiet mail insertion.
- DIN/EN 13724 compliant mailbox, insertion size (3.5 cm x 32.5 cm) for C4 horizontal – even large letters remain intact. Additional retrieval protection made from stainless steel integrated.
- Optimal weather protection with offset bezel.
- Double box system: The bezel can be conveniently installed after the construction work is completed and can be replaced at any time.

Parcel Box Module – Safe and Spacious

- Manufactured from 2 mm stainless steel V2A 1.4301, powder-coated in your desired colour.
- Parcel volume: 130 litres – ideal for large shipments.
- Maximum parcel dimensions: 505 × 655 × 340 mm (W × H × D).
- Front parcel retrieval door 510 × 660 mm, opens from left to right.
- Door equipped with durable stainless steel hinges.
- Innovative T-handle parcel lock with snap closure.
- Including 2 keys with key number.
- Pictogram "PARCEL" as stainless steel laser engraving.

Construction & Details

- Fully welded stand column made of 2 mm stainless steel V2A 1.4301, powder-coated in your desired colour.
- Construction height: 1.70 m.
- Invisible cable routing through the body is possible.
- Footplate made of stainless steel (10 mm thick), concealed by an elegant cover bezel.
- No visible screws or rivets – seamless design.
- Modules can be exchanged even after years – maximum future safety.

Important Information:

To achieve optimal water protection for your mail, the mailbox or mailbox system should ideally be located under a canopy.

The mail is only protected from water if it is completely placed in the box and the insertion flap is closed. Mail that is not fully inserted allows moisture and dirt to enter the mailbox. This unit is protected against water ingress according to DIN EN 13724. Water ingress is not a reason for complaint.
