# 12-unit freestanding letterbox Design BASIC 385P-9016 ST-T with bell box - RAL 9016 traffic white | RAL 9016 Traffic White, fine-textured matt | Left | with 12 mailboxes

**Product number** 385P-9016-12S-SP-L

## Product description

## Freestanding mailbox system BASIC 385P with bell/intercom module on the left for 12 tenants – RAL 9016 Traffic White – narrow version

The freestanding BASIC 385P mailbox system for 12 tenants combines 12 separately usable mail compartments with an integrated bell function box. This brings mail reception, doorbell buttons and the provision for a compatible door intercom system together in a robust, visually unified entrance solution for larger apartment buildings, residential complexes and commercial properties. In this version, the bell/intercom module is positioned to the left of the mailbox system.

The mailboxes are made from galvanised steel and are matt powder-coated in RAL 9016 Traffic White fine texture. A close-fitting side cladding with rain hood and integrated rain drainage channels supports weather protection. The solidly manufactured stand elements made from anodised aluminium profiles are also powder-coated in RAL 9016 Traffic White and provide an especially stable, durable base for the freestanding unit.

Each of the 12 mail compartments has approximately 12 litres of volume. The 35 × 265 mm insertion slot is designed for DIN C4 items in portrait orientation. A noise-dampening rubber lip reduces the impact noise of the flap. Mail is retrieved from the front; the collection doors open from left to right. Each mailbox is supplied with two keys with key number and a changeable nameplate located beneath the insertion flap.

## The advantages of the BASIC 385P mailbox system at a glance

### Integrated bell function box on the left

The unit combines 12 mailboxes with 12 stainless steel doorbell buttons and a speaker aperture with universal adapter. This creates a central, tidy solution for mail and visitor communication.

### Solid aluminium stand elements

Solidly manufactured, anodised aluminium profiles form the stable base of the freestanding unit. The powder-coated construction combines high load-bearing capacity with a durable finish for outdoor use.

### DIN C4 insertion with 12-litre volume

The mailboxes each offer approximately 12 litres of mail volume. The 35 × 265 mm insertion slot accepts DIN C4 items in portrait format without larger envelopes being unnecessarily folded.

### Prepared for door communication

The speaker aperture with universal adapter is prepared for many commercially available flush-mount speakers.

### Robust BASIC quality in RAL 9016 Traffic White

Galvanised steel, stainless steel components, solid aluminium stand elements and German manufacture result in a resilient mailbox system for long-term use at the property entrance.

## Equipment of the BASIC 385P mailbox system

### Mailbox system

**Number of mailboxes** 12 separately usable mail compartments
**Mailbox dimension** 300 × 110 × 385 mm (W × H × D) per compartment
**Mail volume** Approx. 12 litres per mailbox
**Material** Galvanised steel; side cladding and rain hood in stainless steel V2A
**Finish** RAL 9016 Traffic White fine texture matt
**Insertion slot** 35 × 265 mm, suitable for DIN C4 portrait
**Standard** Mailboxes conforming to DIN EN 13724

### Bell and intercom module

**Bell function box** Galvanised steel, powder-coated to match
**Position** Left
**Doorbell buttons** 12 round stainless steel doorbell buttons Type 4
**Speaker aperture** With universal adapter for commercially available flush-mount speakers
**Nameplate** Designed to be resistant to being pressed in and impact-resistant

### Solid aluminium stand elements

**Stand elements** Solidly manufactured, anodised aluminium profile
**Coating** Powder-coated in RAL 9016 Traffic White
**Mounting options** Either bolted installation or cast-into-concrete
**Bolted installation** Stand elements selectable in 1200 or 1600 mm
**Cast-into-concrete** Stand elements selectable in 1600 or 2000 mm
**Delivery condition** Stand elements and mailbox system supplied split for assembly
**Manufacture** Made in Germany by Briefkasten Manufaktur Lippe

**Note regarding the bell/intercom module**

The universal adapter is suitable for many commercially available flush-mount speakers. Intercom systems or built-in speakers, power supply and cabling are not part of the described basic equipment and must be provided to suit the planned system.

#### Mounting on a foundation

For bolted installation, a level and sufficiently load-bearing foundation is required. Fixings must be selected to suit the foundation, unit weight and the local installation situation.

#### Mounting by casting into concrete

For the cast-into-concrete version, the extended aluminium stand elements are anchored plumb in a sufficiently dimensioned concrete foundation. Foundation size and embedment depth must be matched to ground conditions, unit dimensions and local loads.

#### Note on weather protection

The rain hood, close-fitting side cladding and rain drainage channels support weather protection. Postal items must be fully inserted so that the insertion flaps can close completely. Under extreme weather conditions, slight moisture ingress can occur despite compliant construction.

## Product properties

| | |
|---|---|
| **Material** | Steel, galvanised, Aluminium AlMg3 W19, Stainless steel V2A 1.4301 |
| **Series** | BASIC |
| **Number of bell push buttons** | 12 buttons |
| **Functions** | Light button, Intercom |
| **Functional box prepared for manufacturer** | GIRA, Busch Jaeger, Siedle, STR Elektronik, ELCOM, TCS, Ritto, ALGO, Telegärtner, Auerswald, Legrand Bticino, Comelit |
| **Boxes by volume** | Normal > 10 litres |
| **Name labelling** | Nameplate |
| **Mounting type** | Free-standing |
| **Removal of mail** | On the front |
| **Surface/colour** | RAL 9016 traffic white |
| **Number of boxes** | with 12 letterboxes |
