6-compartment stainless steel freestanding mailbox Design BASIC Plus 385 XP SP with doorbell box - RAL colour of your choice | Right | ? Colour of your choice | with 6 letterboxes

Product number 385XP-6-SP-R

Product description

Freestanding mailbox system BASIC Plus 385XP ST-T with bell/intercom module for 6 households – bell module on the right

The freestanding BASIC Plus 385XP ST-T mailbox system for 6 households combines robust stainless steel mailboxes with an integrated bell/intercom module. Mailboxes and visitor communication are thus brought together in a stable, visually cohesive entrance solution for apartment buildings, smaller residential developments and commercial properties. In this version, the bell/intercom module is positioned on the right.

The mailboxes are made from stainless steel V2A and are high-quality powder-coated in an RAL colour of choice. Particularly noteworthy are the solid support uprights made from anodised aluminium profile: they are also powder-coated, very robustly constructed and provide an exceptionally sturdy base for the entire mailbox system. Stainless steel and solid aluminium combine durability with a clear, high-quality architecture.

Each compartment measures 300 × 110 × 385 mm (W × H × D) and offers approx. 12 litres of volume. The 35 × 265 mm inlet slot is designed for DIN C4 items in portrait orientation. A noise-dampening rubber lip on the flap, front mail collection, a robust lock and the changeable nameplate ensure comfortable everyday use.

Advantages of the BASIC Plus 385XP ST-T system at a glance

Mailbox and bell in a single unit

6 mail compartments are combined with a bell/intercom module. This reduces additional individual components at the property entrance and ensures an orderly overall appearance.

Solid aluminium support uprights

Solidly manufactured, anodised aluminium profiles form the particularly robust base of the system. The powder-coated profile construction is designed for high stability and long-term outdoor use.

DIN C4 inlet with 12-litre volume

The 300 × 110 × 385 mm mailboxes each offer approx. 12 litres of mail volume. The 35 × 265 mm inlet slot accepts DIN C4 mail in portrait orientation.

Bell/intercom module prepared

The integrated bell/intercom module provides a central location for call buttons and the integration of compatible intercom technology. The electrical components are executed to match the planned system.

BASIC Plus – built for high durability

The consistent combination of stainless steel V2A and solid aluminium profiles makes the 385XP a particularly robust mailbox system. The modular construction simplifies installation, maintenance and subsequent replacement of individual components.

Equipment of the BASIC Plus 385XP ST-T mailbox system

Mailbox system

Number of mailboxes 6 individually lockable compartments
Individual compartment 300 × 110 × 385 mm (W × H × D)
Mail volume Approx. 12 litres per mailbox
Mailbox material Stainless steel V2A, powder-coated in RAL colour of choice
Inlet slot 35 × 265 mm, suitable for DIN C4 portrait
Manufacture Made in Germany by Briefkasten Manufaktur Lippe

Mail and additional functions

Bell/intercom module Integrated into the mailbox system
Position Right
Call buttons Corresponding to the number of households
Intercom system Prepared for a compatible door communication solution
Electrical connection To be provided on site in accordance with the chosen intercom system
Note Intercom system and connection components depend on the selected configuration

Solid aluminium support uprights

Support uprights Solid anodised aluminium profile, powder-coated
Construction Designed to be particularly robust and load-bearing
Finish RAL colour matching the mailbox system
Installation Freestanding installation on a suitable foundation
Side cladding Close-fitting design
BASIC Plus Modular, maintenance-friendly and installation-oriented design

Note on the bell/intercom module

The specific intercom technology, power supply and cabling depend on the chosen door communication solution. Installation and connection should be carried out by appropriately qualified specialist personnel.

Foundation and secure installation

The solid aluminium support uprights require a level and sufficiently load-bearing base or a suitably dimensioned concrete foundation. Foundation size, fastening and alignment must be matched to the system weight, size, ground conditions and local loads.

Note on weather protection

A rain hood, close-fitting side cladding and rainwater drainage channels support weather protection. Mail items must be fully inserted so that the inlet flaps can close completely.

BASIC Plus – robust and modular

The BASIC Plus design relies on stainless steel V2A and solid aluminium profiles. The modular construction simplifies installation and the later replacement of individual components and is designed for a long service life.

Product properties

Surface/colour	RAL 9005 deep black, RAL 3004 crimson red, DB 703 iron mica, RAL 7016 anthracite grey, RAL of your choice (according to colour table), RAL 9007 grey aluminium, RAL 9016 traffic white
Series	BASIC
Number of bell push buttons	6 buttons
Functions	Light button, Intercom
Functional box prepared for manufacturer	GIRA, Busch Jaeger, Siedle, STR Elektronik, ELCOM, TCS, Ritto, ALGO, Telegärtner, Auerswald, Legrand Bticino, Comelit
Number of boxes	with 6 letterboxes
Boxes by volume	Normal > 10 litres
Name labelling	Nameplate
Material	Aluminium AlMg3 W19, Stainless steel V2A 1.4301
Mounting type	Free-standing
Removal of mail	On the front
