11-unit freestanding mailbox Design BASIC 385P-9016 ST-T with doorbell housing - RAL 9016 traffic white | RAL 9016 Traffic White, fine-textured matt | Left | with 11 mailboxes

Product number 385P-9016-11S-SP-L

Product description

Freestanding mailbox system BASIC 385P with bell/intercom unit on the left for 11 households – RAL 9016 Traffic white – narrow version

The freestanding BASIC 385P mailbox system for 11 households combines 11 individually usable mail compartments with an integrated bell function enclosure. This brings together mail reception, bell buttons and preparation for a compatible door intercom system in a robust, visually unified entrance solution for larger apartment buildings, residential complexes and commercial properties. In this variant, the bell/intercom unit is positioned to the left of the mailbox system.

The mailboxes are made of galvanised steel and finished in RAL 9016 Traffic white with a fine-texture matt powder coating. A close-fitting side panel with rain hood and integrated rain drainage channels support weather protection. The solidly manufactured stand elements of anodised aluminium profile are also powder-coated in RAL 9016 Traffic white and provide a particularly stable, durable base for the freestanding unit.

Each of the 11 mail compartments has approximately 12 litres volume. The 35 × 265 mm insertion aperture is designed for DIN C4 items in portrait format. A noise-dampening rubber lip reduces the impact of the flap. Mail is retrieved from the front; the access doors open from left to right. Each mailbox is supplied with two keys with key number and a replaceable nameplate located beneath the insertion flap.

Advantages of the BASIC 385P mailbox system at a glance

Integrated bell function enclosure on the left

The unit combines 11 mailboxes with 11 stainless steel bell push-buttons and a speaker aperture with universal adapter. This creates a central, tidy solution for mail and visitor communication.

Solid aluminium stand elements

Solidly manufactured, anodised aluminium profiles form the stable base of the freestanding unit. The powder-coated construction combines high load-bearing capacity with a durable finish for outdoor use.

DIN C4 insertion with 12-litre volume

The mailboxes each offer approximately 12 litres of capacity. The 35 × 265 mm insertion aperture accepts DIN C4 items in portrait format without larger envelopes having to be unnecessarily folded.

Prepared for door communication

The speaker aperture with universal adapter is prepared for many commercially available flush-mounted speakers.

Robust BASIC quality in RAL 9016 Traffic white

Galvanised steel, stainless steel components, solid aluminium stand elements and German manufacture create a resilient mailbox system for long-term use at the property entrance.

Equipment of the BASIC 385P mailbox system

Mailbox system

Number of mailboxes 11 individually usable mail compartments
Mailbox size 300 × 110 × 385 mm (W × H × D) per compartment
Mail volume Approx. 12 litres per mailbox
Material Galvanised steel; side panel and rain hood made of V2A stainless steel
Finish RAL 9016 Traffic white fine-texture matt
Insertion aperture 35 × 265 mm, suitable for DIN C4 portrait
Standard Mailboxes conforming to DIN EN 13724

Bell and intercom unit

Bell function enclosure Galvanised steel, matching powder-coated finish
Position Left
Bell push-buttons 11 round stainless steel bell push-buttons, Type 4
Speaker aperture With universal adapter for commercially available flush-mounted speakers
Nameplate Securely fixed and impact-resistant

Solid aluminium stand elements

Stand elements Solidly manufactured anodised aluminium profile
Coating Powder-coated in RAL 9016 Traffic white
Mounting options Either screw mounting or setting in concrete
Screw mounting Stand elements selectable in 1200 or 1600 mm
Setting in concrete Stand elements selectable in 1600 or 2000 mm
Delivery condition Stand elements and mailbox system delivered divided for assembly
Manufacture Made in Germany by Briefkasten Manufaktur Lippe

Note on the bell/intercom unit

The universal adapter is suitable for many commercially available flush-mounted speakers. Intercom systems or flush-mounted speakers, power supply and cabling are not part of the described basic equipment and must be provided to suit the planned system.

Mounting on a foundation

For screw mounting a level and sufficiently load-bearing foundation is required. Fasteners must be selected to suit the foundation, the weight of the unit and the local installation situation.

Mounting by setting in concrete

For the set-in-concrete option the extended aluminium stand elements are anchored vertically in a suitably dimensioned concrete foundation. Foundation size and embedment depth must be matched to ground conditions, unit dimensions and local loads.

Note on weather protection

The rain hood, close-fitting side panel and rain drainage channels support weather protection. Mail items must be fully inserted so that the insertion flaps can close completely. Under extreme weather conditions, minor moisture ingress may occur despite compliant construction.

Product properties

Material	Steel, galvanised, Aluminium AlMg3 W19, Stainless steel V2A 1.4301
Series	BASIC
Number of bell push buttons	11 buttons
Functions	Light button, Intercom
Functional box prepared for manufacturer	GIRA, Busch Jaeger, Siedle, STR Elektronik, ELCOM, TCS, Ritto, ALGO, Telegärtner, Auerswald, Legrand Bticino, Comelit
Boxes by volume	Normal > 10 litres
Name labelling	Nameplate
Mounting type	Free-standing
Removal of mail	On the front
Number of boxes	with 11 letterboxes
Surface/colour	RAL 9016 traffic white
