14-unit freestanding mailbox system Design BASIC 385-VA ST-R - V2A stainless steel, brushed | with 14 mailboxes (2x7) | 300x110x385 mm (WxHxD) - ?? Normal 12 litres | Stainless steel, brushed

Product number 385-VA-14W

Product description

Freestanding 14-unit mailbox system BASIC 385 for 14 households – wide, multi-column version – stainless steel V2A brushed

The freestanding BASIC 385 mailbox system for 14 households combines a robust construction with a clear, functional design. It is suitable for larger apartment buildings, residential complexes and demanding commercial properties and can be positioned independently of the building façade at the entrance to the property, by a driveway or along an access path.

The W configuration distributes the mailboxes in a wider, multi-column layout and creates a clear front for multiple users.

The mailboxes are made of weather-resistant stainless steel V2A 1.4301 and are finely brushed. A close-fitting side cladding with drip roof unites the individual mailboxes into a single, closed unit.

Each compartment features an insertion slot of 35 × 265 mm for DIN C4 items in portrait format. A noise-dampening rubber lip reduces slamming noise, while the front access doors open from left to right. Each mailbox is supplied with two keys with key number and a changeable nameplate beneath the insertion flap.

Key benefits of the BASIC 385 at a glance

Solid stainless steel uprights

Round-tube uprights with approx. 60 mm diameter made of brushed stainless steel V2A 1.4301 form a stable base for the freestanding mailbox system. The robust construction is designed for long-term use at the property entrance.

Large insertion slot to DIN EN 13724

The insertion opening of 35 × 265 mm is designed for DIN C4 items in portrait format. Larger envelopes can also be inserted without folding.

Quiet insertion and convenient retrieval

A noise-dampening rubber lip reduces the impact of the insertion flaps. Mail is retrieved from the front via doors that open from left to right.

Entirely made of brushed stainless steel

The stainless steel version combines mailboxes, cladding and uprights into a high-quality, low-maintenance complete unit.

Proven BASIC quality Made in Germany

The combination of solid material selection, DIN EN 13724-compliant compartments and an installation-friendly construction makes the BASIC 385 a durable solution for daily use.

Equipment of the BASIC 385 mailbox system

Mailbox system

Design Wide, multi-column version
Number of mailboxes 14 individually usable compartments
Mailbox material Stainless steel V2A 1.4301
Finish Stainless steel V2A 1.4301, brushed
Drip roof / side cladding Stainless steel V2A 1.4301, brushed
Manufacture Made in Germany by Briefkasten Manufaktur Lippe

Mail and handling

Insertion opening 35 × 265 mm, suitable for DIN C4 portrait
Insertion flaps With noise-dampening rubber lip
Mail retrieval Front access
Door opening From left to right
Keys 2 keys with key number per mailbox
Nameplate Changeable nameplate beneath the insertion flap
Standard Mailboxes conforming to DIN EN 13724

Uprights and fittings

Uprights Round tube approx. 60 mm made of stainless steel V2A 1.4301, brushed
Mounting options Optionally for bolted installation or for casting into concrete
Fastening Anchor bolts for bolted installation are not included; select appropriate ones for the foundation separately

Mailbox size and volume

The BASIC 385 is available with different mailbox sizes depending on the product configuration. The standard version 300 × 110 × 385 mm offers approx. 12 litres volume; depending on the variant, 300 × 220 × 385 mm with approx. 25 litres volume is also available.

Installation by casting into concrete

For the freestanding system we recommend a suitably sized concrete foundation. When casting into concrete, the stainless steel uprights must be set plumb and permanently anchored in the foundation. Foundation size and embedment depth should be matched to ground conditions, system weight and local requirements.

Bolted installation on a foundation

For bolted installation, a level and load-bearing concrete foundation is required. Suitable anchor bolts or fixings must be chosen according to the substrate and the load. For the BASIC-385-ST-R variants, anchor bolts are not included in the basic delivery scope.

Note on weather protection

Mail is best protected from moisture and soiling only when fully inserted and the insertion flap is closed. Protruding items can prevent the flap from closing completely. In extreme weather conditions, moisture may enter the mailbox despite standard-compliant construction.

Product properties

Series	BASIC
Boxes by volume	Normal > 10 litres
Name labelling	Nameplate
Mounting type	Free-standing
Material	Stainless steel V2A 1.4301
Removal of mail	On the front
Surface/colour	Brushed
Number of boxes	with 14 letterboxes
