Gira System 106 IP voice module, stainless steel, powder-coated to a RAL colour | ? RAL colour of your choice

Product number S106-5592920-RAL

Product description

Gira System 106 Speech Module IP Stainless steel, powder-coated to RAL colour

The **Gira System 106 Speech Module IP** is a central communication module for modern **door stations** in the **Gira System 106**. It enables high-quality audio communication between indoor and outdoor areas in **HD quality** and supports a convenient **full-duplex hands-free function**. This allows conversations to be held naturally, clearly and without mutual interruptions.

For reliable voice transmission the module features **two integrated microphones** and a **weatherproof loudspeaker**. Even in increased ambient noise, intelligibility remains good because disturbing background noise is effectively reduced by **Active Noise Cancelling (ANC)**. This makes the IP speech module particularly attractive for entrance areas of residential and commercial properties with elevated noise levels.

Power is supplied via **Power over Ethernet (PoE)**. This simplifies installation, as data transmission and power supply are combined over the network connection. At the same time, the IP speech module supplies power to other **System 106 modules** of the door station, thereby taking on an important role within the overall door communication system.

Key features

- Speech module for the **Gira door communication IP** in System 106, powder-coated in desired colour
- High-quality audio communication in **HD quality**
- **Full-duplex hands-free** for natural conversation
- Two integrated microphones and a weatherproof loudspeaker
- **Active Noise Cancelling (ANC)** to reduce ambient noise
- Power supply via **PoE**
- Supplies power to other modules of the **Gira System 106 door station**

Technical data

Power supply	PoE via RJ45, PoE standard IEEE 802.3af-2003, IEEE 802.3at-2009, IEEE 802.3bt-2018-1; only power injectors with a maximum output power of 30 W may be used
Protection class	III (SELV)
Power consumption in standby	1.75 W
Power consumption in audio call mode	2.50 W
Power consumption in video call mode	2.76 W
Network / PoE connection	RJ45 (to be operated only in conjunction with the supplied patch cable)
Video component connections	1 x connection for camera module, 1 x connection for call display module
System connections	2 x connector strips
Ambient temperature	-20 °C to +50 °C

Application

The **IP speech module for Gira System 106** is suitable for high-quality door communication solutions in residential and commercial settings. It is particularly useful where clear voice transmission, structured system integration and robust outdoor construction are required.

Product properties

Surface/colour	RAL 9005 deep black, RAL 3004 crimson red, DB 703 iron mica, RAL 7016 anthracite grey, RAL of your choice (according to colour table), RAL 9007 grey aluminium, RAL 9016 traffic white
Connection technology	LAN
Material	Stainless steel V2A 1.4301

Dimensions

Width in mm	106.5
Height in mm	106.5
Total width in mm	106.5
Depth in mm	2,0
Weight in kg	1
