Design flush-mounted mailbox GOETHE UP with newspaper compartment - RAL colour of your choice | 100mm depth

Product number 215-UP-ZF-1-100

Product description

Design flush-mounted letterbox GOETHE UP with newspaper compartment - RAL colour of your choice

The modern flush-mounted letterbox GOETHE is ideal for discerning entrance areas. The clean-lined shape without a visible lock gives this letterbox an especially elegant appearance.

The dimensions of the single box provide a capacity of approx. 16 or 32 litres; the large aperture ensures that even C4 envelopes and magazines, or post accumulated during several days of absence, do not get creased. The innovative push-key lock is hidden invisibly inside the letterbox. The key is simply inserted into the available opening (no turning necessary) and the door opens. The placement of the lock is designed so that the collection door prevents your post from falling out towards you. The water drainage edge ensures that the post stored inside is optimally protected from the weather. The inlet flap is fitted with high-quality hinge dampers, ensuring quiet closing and preventing annoying rattling caused by weather conditions.

The newspaper compartment is particularly convenient, as the newspaper can be placed in fully. This protects the newspaper from the weather and allows it to be inserted without creasing. To remove it, simply open the flap upwards and the newspaper can be taken out comfortably.

The letterbox systems of the GOETHE collection are characterised by the consistent use of stainless steel. The result is very high durability and sustainability. The construction has been developed by our own engineers with a focus on high flexibility and modularity, easy spare-part assembly and uncomplicated self-installation. Spare parts for all GOETHE systems are available directly in our shop.

Thanks to the design, self-installation is straightforward.

- Plaster cover frame made from stainless steel angle profile 25 x 58 mm, powder-coated in RAL colour.

Important information:

For optimal protection of your post from water, the letterbox or letterbox system should, where possible, be located under an overhang.

Post is only protected from water when it is placed completely inside the box and the inlet flap is closed. Partially inserted post allows moisture and dirt to enter the letterbox. This system is protected against water ingress according to DIN EN 13724. Water ingress is not grounds for complaint.
