6-unit 3x2 freestanding mailbox system Design BASIC 385P ST-T - stainless steel RAL 7016 anthracite grey | 300x110x385 mm (WxHxD) - ?? Normal 12 litres | BI-Color brushed stainless steel | RAL 7016 anthracite grey | with 6 letterboxes (2x3)

Product number 385P-7016VA-6W

Product description

Freestanding mailbox system BASIC 385P for 6 households – BI-Colour stainless steel / RAL 7016 – wide version

The freestanding BASIC 385P mailbox system for 6 households is designed for multi-family homes, smaller residential complexes and commercial properties. Six separately lockable mail compartments are arranged in a wide multi-column configuration to form a stable, clear overall system. Freestanding installation allows for a conveniently accessible position independently of the building façade.

The mailbox bodies are made of galvanised steel and are powder-coated in RAL 7016 anthracite grey with a fine-textured matt finish. Brushed stainless steel mail flaps create a high-quality BI-Colour accent. Side cladding and rain canopy are made of stainless steel V2A and are powder-coated in matching RAL 7016. Particularly distinctive are the solidly manufactured support posts made from anodised aluminium profile, which are also finished in anthracite grey and give the system a secure, very robust stance.

Each of the six mail compartments has approx. 12 litres of capacity. The 35 × 265 mm aperture is designed for DIN C4 items in portrait orientation. A noise-damping rubber lip reduces the impact of the mail flap. Mail is retrieved from the front; the retrieval doors open from left to right. Each mailbox is supplied with two keys bearing a key number and one interchangeable nameplate located beneath the mail flap.

The advantages of the BASIC 385P mailbox system at a glance

Solid aluminium support posts

Solidly manufactured, anodised aluminium profiles form the stable base of the freestanding system. The powder-coated construction combines high load-bearing capacity with a durable finish for outdoor use.

DIN C4 aperture with 12-litre capacity

The mailboxes each offer approx. 12 litres of postal capacity. The 35 × 265 mm aperture accepts DIN C4 items in portrait orientation without larger envelopes needing to be unnecessarily folded.

Quiet insertion and reliable operation

Rubber lips dampen the mail flaps. Robust locks, two keys per compartment and protected interchangeable nameplates are designed for daily use in multi-occupancy properties.

Bolt fixing or concreting in

Depending on the chosen version, the aluminium support posts are bolted to a load-bearing foundation or permanently concreted in. This allows the system to be installed to suit the site conditions.

BI-Colour stainless steel / RAL 7016

Brushed stainless steel mail flaps provide a high-quality contrast to the anthracite-grey mailbox bodies. The robust material combination combines modern aesthetics with long-lasting everyday suitability.

Equipment of the BASIC 385P mailbox system

Mailbox system

Number of mailboxes 6 separately usable mail compartments
Mailbox dimensions 300 × 110 × 385 mm (W × H × D) per compartment
Postal capacity Approx. 12 litres per mailbox
Material Galvanised steel; side cladding and rain canopy made of stainless steel V2A
Finish BI-Colour: RAL 7016 anthracite grey with brushed stainless steel mail flaps
Aperture 35 × 265 mm, suitable for DIN C4 portrait
Standard Mailboxes conforming to DIN EN 13724

Mail and operation

Mail flaps With noise-damping rubber lip
Mail retrieval From the front
Door opening From left to right
Keys 12 keys in total, 2 per mailbox
Nameplates 6 interchangeable nameplates beneath the mail flaps
Rain drainage Integrated rain drainage channels

Solid aluminium support posts

Support posts Solidly manufactured, anodised aluminium profile
Coating Powder-coated in RAL 7016 anthracite grey
Mounting options Bolt fixing or concreting in
Bolt fixing Support posts selectable in 1200 or 1600 mm
Concreting in Support posts selectable in 1600 or 2000 mm
Condition on delivery Support posts and mailbox system supplied split for installation

Installation on a foundation

For bolt fixing, a level and sufficiently load-bearing foundation is required. The fastening materials must be selected to suit the foundation, system weight and local installation conditions.

Installation by concreting in

For the concreting-in version, the extended aluminium support posts are anchored plumb in an adequately sized concrete foundation. Foundation dimensions and embedment depth must be matched to ground conditions, system dimensions and local loads.

Note on weather protection

The rain canopy, close-fitting side cladding and rain drainage channels support weather protection. Mail items must be fully inserted so that the mail flaps can close completely. Under extreme weather conditions, despite standards-compliant construction, small amounts of moisture may penetrate.

Product properties

Material	Steel, galvanised, Aluminium AlMg3 W19, Stainless steel V2A 1.4301
Series	BASIC
Number of boxes	with 6 letterboxes
Boxes by volume	Normal > 10 litres
Name labelling	Nameplate
Mounting type	Free-standing
Surface/colour	RAL 7016 anthracite grey, Brushed
Removal of mail	On the front
