19-unit freestanding mailbox system Design BASIC 385-VA ST-R - stainless steel V2A, brushed | 300x110x385 mm (WxHxD) - ?? Normal 12 litres | Stainless steel, brushed | with 19 mailboxes

Product number 385-VA-19

Product description

Freestanding 19-unit mailbox system BASIC 385 for 19 households – stainless steel V2A brushed

The freestanding BASIC 385 mailbox system for 19 households combines a robust construction with a clear, functional design. It is suitable for larger apartment buildings, residential complexes and demanding commercial properties and can be positioned independently of the building façade at the entrance to the property, at a driveway or along the access path.

The system configuration is matched to the respective number of units and, together with a rain hood and side cladding, forms a cohesive unit.

The mailboxes are made of weather-resistant stainless steel V2A 1.4301 and are finely brushed. A close-fitting side cladding with rain hood brings the individual mailboxes together into a single unified system.

Each mailbox features an insertion opening of 35 × 265 mm for DIN C4 items in portrait format. A noise-damping rubber lip reduces impact noise, while the front access doors open from left to right. Each mailbox includes two keys with key number and a changeable nameplate below the insertion flap.

The advantages of the BASIC 385 at a glance

Solid stainless steel support posts

Round-tube support posts with approx. 60 mm diameter made of brushed stainless steel V2A 1.4301 form a stable base for the freestanding mailbox system. The robust construction is designed for permanent use at the property entrance.

Mail solution for multiple occupancy units

The system provides 19 separately usable mail compartments and can be installed independently of a wall at a conveniently accessible location on the property.

Large insertion opening according to DIN EN 13724

The insertion opening of 35 × 265 mm is designed for DIN C4 items in portrait format. Larger envelopes can also be inserted without folding.

Quiet insertion and comfortable removal

A noise-damping rubber lip reduces the impact of the insertion flaps. Mail is removed from the front via doors that open from left to right.

Proven BASIC quality Made in Germany

The combination of solid material selection, DIN EN 13724-compliant mail compartments and an assembly-friendly construction makes the BASIC 385 a long-lasting solution for daily use.

Equipment of the BASIC 385 mailbox system

Mailbox system

Design Article-specific system configuration
Number of mailboxes 19 separately usable mail compartments
Mailbox material Stainless steel V2A 1.4301
Surface Stainless steel V2A 1.4301, brushed
Rain hood / side cladding Stainless steel V2A 1.4301, brushed
Manufacture Made in Germany by Briefkasten Manufaktur Lippe

Mail and operation

Insertion opening 35 × 265 mm, suitable for DIN C4 portrait
Insertion flaps With noise-damping rubber lip
Mail removal From the front
Door opening From left to right
Keys 2 keys with key number per mailbox
Nameplate Changeable nameplate below the insertion flap
Standard Mailboxes compliant with DIN EN 13724

Support posts and accessories

Support posts Round tube approx. 60 mm made of stainless steel V2A 1.4301, brushed
Mounting options Optionally for screw mounting or for concreting in
Fixings Bolt anchors for screw mounting not included; select separately to suit the foundation

Mailbox size and volume

The BASIC 385 is available with different mailbox sizes depending on the product configuration. The standard version 300 × 110 × 385 mm offers approx. 12 litres volume; depending on the variant, 300 × 220 × 385 mm with approx. 25 litres volume is also available.

Mounting by concreting in

For the freestanding system we recommend a suitably dimensioned concrete foundation. When concreting in, the stainless steel support posts must be aligned plumb and permanently anchored in the foundation. Foundation size and embedment depth must be matched to the ground conditions, system weight and local circumstances.

Screw mounting on a foundation

For screw mounting a level and load-bearing concrete foundation is required. Suitable bolt anchors or fixings must be selected to suit the substrate and the system load. For the BASIC-385-ST-R versions, bolt anchors are not included in the standard scope of delivery.

Note on weather protection

Mail is best protected from moisture and soiling only when it is fully inserted and the insertion flap is closed. Protruding items can prevent the flap from closing completely. Under extreme weather conditions, moisture may enter the mailbox despite compliant construction.

Product properties

Series	BASIC
Boxes by volume	Normal > 10 litres
Name labelling	Nameplate
Mounting type	Free-standing
Material	Stainless steel V2A 1.4301
Number of boxes	with 19 letterboxes
Removal of mail	On the front
Surface/colour	Brushed
