2-unit freestanding mailbox Design BASIC 385 ST-R with doorbell box - RAL 7016 anthracite grey | RAL 7016 Anthracite grey, fine texture, matt | Top | with 2 mailboxes

Product number 385-7016-2-SP

Product description

Freestanding 2-unit mailbox system BASIC 385 for 2 households with bell/intercom module – RAL 7016 Anthracite grey

For semi-detached houses, houses with a self-contained annexe and smaller commercial properties, the freestanding BASIC 385 as a 2-household system offers a durable and clear entrance solution. Thanks to independent stand mounting, the mailbox system can be positioned to suit the plot and access situation.

The system configuration is matched to the respective number of households and, together with a rain hood and side cladding, forms a closed unit.

The mailboxes are made of galvanised steel and are powder-coated in RAL 7016 Anthracite grey, fine-textured matt. A close-fitting side cladding with rain hood joins the individual mailboxes into a single closed unit.

Each compartment has an insertion slot of 35 × 265 mm for DIN C4 items in portrait format. A noise-dampening rubber lip reduces impact noise, while the front access doors open from left to right. Each mailbox is supplied with two keys with key numbers and a replaceable nameplate located below the mail flap.

The integrated bell/intercom module combines doorbell functionality and preparation for an intercom system directly in the mailbox unit.

The advantages of the BASIC 385 at a glance

Solid stainless-steel support posts

Round-tube support posts with approx. 60 mm diameter in brushed stainless steel V2A 1.4301 form a stable base for the freestanding mailbox system. The robust construction is designed for continuous use at the property entrance.

Large insertion slot to DIN EN 13724

The insertion opening of 35 × 265 mm is designed for DIN C4 items in portrait format. Larger envelopes can also be inserted without folding.

Quiet insertion and comfortable retrieval

A noise-dampening rubber lip reduces the impact of the mail flaps. Mail is retrieved from the front via doors that open from left to right.

Durable surface in RAL 7016

The matt fine-textured surface in Anthracite grey combines a modern appearance with a resilient coating on the galvanised steel.

Bell/intercom module directly integrated

The doorbell/intercom panel is integrated directly into the mailbox system.

Equipment of the BASIC 385 mailbox system

Mailbox system

Design Article-specific system configuration
Number of mailboxes 2 separately usable compartments
Mailbox material Galvanised steel
Surface RAL 7016 Anthracite grey fine-texture matt
Rain hood / side cladding Galvanised steel, powder-coated in RAL 7016 Anthracite grey fine-texture matt
Manufacture Made in Germany by Briefkasten Manufaktur Lippe

Mail and operation

Insertion opening 35 × 265 mm, suitable for DIN C4 portrait
Mail flaps With noise-dampening rubber lip
Mail retrieval Front
Door opening From left to right
Keys 2 keys with key number per mailbox
Nameplate Replaceable nameplate below the mail flap
Standard Mailboxes conforming to DIN EN 13724

Support posts and features

Support posts Round tube approx. 60 mm in stainless steel V2A 1.4301, brushed
Mounting options Either for bolted mounting or for casting into concrete
Fixings Anchor bolts for bolted mounting are not included; select appropriate anchors to match the foundation separately
Bell/intercom module Integrated functional panel
Intercom preparation Speaker aperture with universal adapter for standard recessed speakers
Doorbell push-button Round stainless steel doorbell push-buttons matching the product design

Mailbox size and volume

The BASIC 385 is available with different mailbox sizes depending on the product configuration. The standard version 300 × 110 × 385 mm offers approx. 12 litres of volume; depending on the variant, 300 × 220 × 385 mm with approx. 25 litres of volume is also available.

Installation by casting into concrete

For the freestanding system we recommend a adequately sized concrete foundation. When casting into concrete, the stainless-steel support posts must be aligned plumb and permanently anchored in the foundation. Foundation size and embedment depth should be matched to ground conditions, system weight and local circumstances.

Bolted mounting on a foundation

For bolted mounting a flat, load-bearing concrete foundation is required. Suitable anchor bolts or fasteners must be selected to match the substrate and the system load. For the BASIC-385-ST-R variants, anchor bolts are not included in the standard scope of delivery.

Note on weather protection

Postal items are best protected from moisture and dirt only when fully inserted and with the mail flap closed. Protruding items may prevent the flap from closing completely. In extreme weather conditions, moisture can enter the mailbox despite compliant construction.

Note on bell and intercom technology

The bell/intercom module is prepared with a speaker aperture and a universal adapter for common recessed speakers. Intercom systems or recessed speakers are not included as standard. Planning, connection and commissioning of electrical components should be carried out by a qualified electrician.

Product properties

Material	Steel, galvanised, Stainless steel V2A 1.4301
Series	BASIC
Number of bell push buttons	2 buttons
Functions	Light button, Intercom
Functional box prepared for manufacturer	GIRA, Busch Jaeger, Siedle, STR Elektronik, ELCOM, TCS, Ritto, ALGO, Telegärtner, Auerswald, Legrand Bticino, Comelit
Boxes by volume	Normal > 10 litres
Name labelling	Nameplate
Mounting type	Free-standing
Surface/colour	RAL 7016 anthracite grey
Number of boxes	with 2 letterboxes
Removal of mail	On the front
