Designer flush-mounted mailbox GOETHE UP with newspaper compartment - RAL colour of your choice - LOXONE Intercom-ready | with newspaper compartment | 100mm depth | Prepared for dual LOXONE Intercom + Code Touch

Product number 215-UP-1-SP-ZF-LOX1-LOX2H

Product description

Designer recessed mailbox GOETHE UP with newspaper compartment - RAL colour of your choice - LOXONE Intercom prepared

High-quality recessed mailbox with newspaper compartment in a flush-fit design. The modern GOETHE mailbox is ideal for a high-end entrance area. The clean-lined design without a visible lock gives this mailbox an especially elegant appearance. The LOXONE Intercom can be integrated seamlessly into the flush-fit design and exchanged at any time. The preparation is provided for 1 piece LOXONE Intercom (including opening for sound output) or 1 piece LOXONE Intercom (including opening for sound output) + 1 piece LOXONE NFC Code Touch/Touch Pure.

The dimensions of the single box allow a capacity of approx. 16 litres; the large slot also guarantees that C4 envelopes and magazines — or post accumulated during several days' absence — do not arrive creased. The innovative Push-Key lock is concealed invisibly inside the mailbox. The key is simply inserted into the existing opening (no turning required) and the door opens. With the arrangement of the lock, this mailbox is designed so that the retrieval door prevents your post from falling out. Thanks to the water drainage edge, the internal mail is optimally protected from the weather. The insertion flap is equipped with high-quality axle dampers, ensuring a quiet closing and preventing annoying rattling caused by weather conditions.

The mailbox systems of the GOETHE collection are characterised by the consistent use of stainless steel. The result is very high durability and sustainability. The construction has been developed by our own engineers with a focus on high flexibility and modularity, simple replacement part installation and uncomplicated self-assembly. Spare parts for all GOETHE systems are available directly in our shop.

Thanks to the design, self-assembly is straightforward.

Protected utility model according to DPMA file reference DE: 20 2021 101 679.5

- Plaster cover frame made from 2 mm stainless steel angle profile 25 x 58 mm, powder-coated in an RAL colour.
- **WITHOUT LOXONE Intercom/system components!**

Important information

Camera or intercom station preparation

We always recommend that the electrical installation be carried out by a qualified electrician.

We offer preparation for intercom stations from various manufacturers for our mailboxes. The preparation does not include any end devices; it comprises the provision of mounting points, drill-holes and perforations so that you can install your device without difficulty.

Water protection

To achieve optimal water protection for your mail, the mailbox or mailbox system should, where possible, be located under a canopy.

Mail is only protected from water when it is placed completely inside the box and the insertion flap is closed. Partially inserted mail allows moisture and dirt to enter the mailbox. This system is protected against water ingress in accordance with DIN EN 13724. Water ingress is not grounds for complaint.
