Surface-mounted mailbox system STORM for 10 units – 5-column – RAL 7016 anthracite grey | RAL 7016 Anthracite grey, fine texture, matt | with 10 mailboxes (5x2)

Product number 480A-10-5X2-7016

Product description

Surface-mounted mailbox system STORM for 10 households – RAL 7016 Anthracite grey

The STORM surface-mounted mailbox system for 10 households provides a high-quality mail solution for larger multi-family houses, residential and commercial buildings as well as properties used for commercial purposes. Ten separately lockable mail compartments allow clear allocation to residents, tenants or individual usage units.

Mailboxes, weather hood and side panels are made from high-quality manufactured galvanised steel and are fully powder-coated in RAL 7016 Anthracite grey fine-textured matt. The homogeneous surface gives even the larger multi-occupant system a calm, particularly high-quality appearance.

All 10 mail compartments feature a 35 × 340 mm insertion opening for DIN C4 landscape, noise-dampening rubber buffers, downward-opening collection doors with opening stops and integrated mail retention brackets. Two keys and a protected replaceable nameplate are supplied with each mailbox.

The advantages of the STORM surface-mounted mailbox system at a glance

High-quality mailbox solution for 10 households

Ten separate mail compartments make this STORM system a powerful entrance solution for larger multi-family houses, residential and commercial buildings as well as properties with multiple independent usage units.

High material quality from galvanised steel

The complete mailbox system including weather hood and side panels is based on high-quality manufactured galvanised steel. The robust construction is designed for durable daily use.

High-quality surface in RAL 7016

RAL 7016 Anthracite grey fine-textured matt is applied consistently to mailboxes, weather hood and side panels. This creates a uniform and architecturally calm appearance despite the size of the system.

Large DIN C4 insertion for each unit

Each of the ten mail compartments has a 35 × 340 mm insertion aperture. DIN C4 envelopes can be inserted in landscape orientation without unnecessary folding.

Comfortable use despite 10 mail compartments

Rubber buffers ensure quiet closing, opening stops assist mail retrieval and mail retention brackets hold items back when opening. Each compartment is separately lockable and has its own nameplate.

Equipment of the STORM surface-mounted mailbox system

Construction and surface

Configuration 5 columns × 2 rows
Mail compartments 10 separately lockable mailboxes
Mailbox material Galvanised steel
Weather hood and side panels Galvanised steel
Surface RAL 7016 Anthracite grey fine-textured matt
Standard Mailboxes in accordance with DIN EN 13724

Mail convenience

Insertion opening 35 × 340 mm per mailbox, DIN C4 landscape
Letter flaps With noise-dampening rubber buffers
Mail collection Front-facing, downward-opening with opening stop
Mail retention brackets Integrated per mailbox
Keys 20 in total, 2 per mailbox
Nameplates 10 protected replaceable nameplates

Installation and manufacture

Installation type Surface-mounted wall installation
Mounting screws Included in delivery
Application Larger multi-family houses, residential and commercial buildings as well as commercial properties
Manufacture Made in Germany by Briefkasten Manufaktur Lippe

Note on weather protection

For optimal protection of mail we recommend a sheltered installation location. All items must be fully inserted so that the letter flaps can close completely.

Note on wall installation

For a mailbox system of this size the load-bearing capacity, evenness and fastening options of the wall must be checked particularly carefully. Anchoring must be carried out appropriate to the wall construction.
