2-unit stainless steel mailbox system Design BASIC Plus 385XW for side wall mounting - RAL colour of your choice | Left | with 2 letterboxes (1x2)

Product number 385XW-2S

Product description

Side-mounted BASIC Plus 385XW mailbox system for 2 households – box position left

The BASIC Plus 385XW is a high-quality stainless steel mailbox system for side wall mounting for 2 households. It was developed for semi-detached houses, houses with a granny flat and small office units and enables space-saving installation to the side of the front door or on a suitable wall area.

The two mail compartments are arranged vertically and therefore require little wall length along the side mounting surface.

The mailboxes are made of stainless steel V2A 1.4301 and are powder-coated in a RAL or DB colour of your choice. The rain hood and side cladding are also made of stainless steel. The side fixing is via 60.3 mm stainless steel posts with a 240-grit brushed finish.

In this product variant the box position is on the left. The side arrangement creates a clear mounting edge and allows the mailbox system to be aligned with the existing entrance situation.

The advantages of the BASIC Plus 385XW at a glance

Heavy-duty stainless steel fixing posts

The side wall fixing is via Ø 60.3 mm posts made of stainless steel V2A 1.4301 with a 240-grit brushed finish. They provide a stable and long-lasting connection between the mailbox system and the building wall.

Side wall mounting

The 385XW is mounted to a suitable house wall at the side. The box position of this variant is left; this allows the unit to be specifically adapted to the existing entrance situation.

BASIC Plus in stainless steel V2A

Mailboxes, cladding and fixing elements consistently use stainless steel V2A 1.4301. The powder-coated mailboxes combine a high-quality surface with a durable construction.

DIN C4 aperture with rubber lip

Each mail compartment has an insertion aperture of 35 × 265 mm suitable for DIN C4 portrait format. A noise-damping rubber lip reduces the slamming of the flap.

Robust solution for 2 households

Two fully functional mail compartments in a narrow, durable stainless steel unit. The modular BASIC Plus construction also facilitates maintenance and spare part installation.

Equipment of the BASIC Plus 385XW for 2 households

Mailbox system

Number of mail compartments 2 mailboxes
Arrangement 1 column × 2 rows
Material Stainless steel V2A 1.4301
Surface Powder-coated in RAL/DB colour of your choice
Rain hood / side cladding Stainless steel V2A 1.4301, powder-coated in matching colour
Manufacture Made in Germany by Briefkasten Manufaktur Lippe

Mail and operation

Insertion aperture 35 × 265 mm per mailbox, suitable for DIN C4 portrait
Mail volume Approx. 12 litres per mailbox

The wall must be clean, even and sufficiently load-bearing for the weight of the complete mailbox system. Anchor bolts or coach screws are not included and must be chosen to suit the wall construction, unit weight and local installation situation.

Note on weather protection

Mail items must be fully inserted so that the insertion flaps can close. The front of the mailbox should ideally not be directly exposed to the main prevailing weather. Under extreme weather conditions, moisture may penetrate despite compliant design.

Care and BASIC Plus construction

Stainless steel V2A is low-maintenance and durable. The modular BASIC Plus construction has been designed for straightforward installation and good spare parts availability.

Product properties

Surface/colour	RAL 9005 deep black, RAL 3004 crimson red, DB 703 iron mica, RAL 7016 anthracite grey, RAL of your choice (according to colour table), RAL 9007 grey aluminium, RAL 9016 traffic white
Series	BASIC
