Module with 1x BASIC combination doorbell button Typ 2 – illuminated | RAL 9007 grey aluminium, fine-structure matt

Product number BML-9860-STKD-376-KL-1-9007

Product description

Module with BASIC combination doorbell push-button Type 2 – with LED illumination

The module with BASIC combination doorbell push-button Type 2 is the ideal addition for modular column solutions and allows integration of a high-quality doorbell push-button with an illuminated nameplate.

The combination push-button combines the doorbell function and name identification in a compact element. The integrated LED illumination ensures the nameplate remains clearly visible in the dark and supports convenient orientation in the entrance area.

The integrated microswitch provides reliable actuation with a distinct switching point. This makes the doorbell push-button suitable for daily use at private homes, multi-family dwellings and commercial properties.

The module is inserted into the designated module slot and integrates neatly into the overall system. The clear, understated design is particularly well suited to modern mailbox and door communication solutions where function and design are to be combined discreetly.

The LED illumination provides subtle lighting of the nameplate and is not intended for general illumination of paths or entrance areas.
Module colour: RAL 9007 grey aluminium, fine-textured matt

Product properties

Material	Stainless steel V2A 1.4301
Surface/colour	RAL 9007 grey aluminium
