# 7-unit stainless-steel mailbox system Design BASIC Plus 385XW for side wall mounting - RAL colour of your choice | Left | with 7 mailboxes

**Product number** 385XW-7S

## Product description

## Side-mounted BASIC Plus 385XW mailbox system for 7 households – box position left

The BASIC Plus 385XW is a high-quality stainless steel mailbox system for side wall mounting for 7 households. It was developed for residential and commercial buildings with seven separate users and enables space-saving installation to the side of the entrance or on a suitable wall surface.

The slim 1×7 arrangement provides seven parties with their own compartments without requiring a wide façade area for installation.

The mailboxes are made of stainless steel V2A 1.4301 and are powder-coated in a RAL or DB colour of your choice. The rain hood and side cladding are also made of stainless steel. Side mounting is carried out using 60.3 mm diameter stainless steel posts with a 240-grit finish.

In this item variant the box position is on the left. The side arrangement creates a clear mounting edge and allows the mailbox system to be aligned with the entrance situation on site.

## The advantages of the BASIC Plus 385XW at a glance

### Massive stainless steel mounting posts

Side wall mounting is achieved via Ø 60.3 mm posts made of stainless steel V2A 1.4301 with a 240-grit finish. They provide a stable and durable connection between the mailbox system and the building wall.

### Side wall mounting

The 385XW is mounted to the side of a suitable external wall. The box position for this variant is on the left, allowing the system to be specifically adapted to the existing entrance situation.

### BASIC Plus in stainless steel V2A

Mailboxes, cladding and fixing elements consistently use stainless steel V2A 1.4301. The powder-coated mailboxes combine a high-quality surface with a durable construction.

### DIN C4 aperture with rubber lip

Each compartment has an insertion opening of 35 × 265 mm suitable for DIN C4 portrait. A noise-damping rubber lip reduces the impact noise of the flap.

### Robust solution for 7 households

Seven separate compartments are combined in a space-saving modular stainless steel system for demanding entrance areas. The modular BASIC Plus construction also facilitates maintenance and spare parts replacement.

## Equipment of the BASIC Plus 385XW for 7 households

### Mailbox system

**Number of compartments** 7 mailboxes
**Arrangement** 1 column × 7 rows
**Material** Stainless steel V2A 1.4301
**Surface** Powder-coated in RAL/DB colour of your choice
**Rain hood / side cladding** Stainless steel V2A 1.4301, powder-coated in matching colour
**Manufacture** Made in Germany by Briefkasten Manufaktur Lippe

### Mail and operation

**Insertion opening** 35 × 265 mm per mailbox, suitable for DIN C4 portrait
**Mail volume** Approx. 12 litres per mailbox
**Insertion flaps** With noise-damping rubber lip
**Mail retrieval** From the front
**Door opening** Left to right
**Keys** 14 keys in total, 2 per mailbox
**Nameplates** 7 interchangeable nameplates under the insertion flaps

### Side mounting

**Box position** Left
**Mounting posts** Ø 60.3 mm stainless steel V2A 1.4301
**Post surface** 240-grit brushed finish
**Type of installation** Screw mounting to a suitable external wall
**Fastening materials** Select anchor bolts or threaded rods on site to suit the wall construction
**Standard** Mailboxes in accordance with DIN EN 13724

**Note on side wall mounting**

The wall must be clean, even and sufficiently load-bearing for the weight of the complete mailbox system. Anchor bolts or threaded rods are not included and must be selected to suit the wall construction, system weight and local installation situation.

#### Note on weather protection

Mail items must be fully inserted so that the insertion flaps can close. The insertion front should ideally not be directly exposed to the prevailing weather. Under extreme weather conditions, moisture may penetrate despite compliant construction.

#### Care and BASIC Plus construction

Stainless steel V2A is low-maintenance and durable. The modular BASIC Plus construction has been designed for straightforward installation and good spare parts availability.

## Product properties

| | |
|---|---|
| **Surface/colour** | RAL 9005 deep black, RAL 3004 crimson red, DB 703 iron mica, RAL 7016 anthracite grey, RAL of your choice (according to colour table), RAL 9007 grey aluminium, RAL 9016 traffic white |
| **Series** | BASIC |
| **Boxes by volume** | Normal > 10 litres |
| **Name labelling** | Nameplate |
| **Material** | Stainless steel V2A 1.4301 |
| **House number** | House number as laser engraving |
| **Number of boxes** | with 7 letterboxes |
| **Removal of mail** | On the front |
| **Mounting type** | Surface-mounted |
