15-unit (3x5) freestanding mailbox Design BASIC 385P-9016 ST-T - RAL 9016 Traffic white | RAL 9016 Traffic White, fine-textured matt | 300x110x385 mm (WxHxD) - ?? Normal 12 litres | with 15 mailboxes

Product number 385P-9016-15W

Product description

Freestanding mailbox system BASIC 385P for 15 households – RAL 9016 Traffic White – wide version

The freestanding BASIC 385P mailbox system for 15 households is designed for large residential complexes, multi-occupancy properties and commercially used buildings. Fifteen separately lockable mail compartments are combined in a wide multi-column arrangement to form a stable, clearly organised overall unit. The free-standing installation allows a conveniently accessible position independent of the building façade.

The mailboxes are made of galvanised steel and are powder-coated in RAL 9016 Traffic White with a fine-textured matt finish. A close-fitting side cladding with rain canopy and integrated rain gutters support weather protection. The solidly manufactured upright posts made of anodised aluminium profile are also powder-coated in RAL 9016 Traffic White and provide an especially stable, long-lasting base for the freestanding unit.

Each of the 15 mail compartments has approximately 12 litres of volume. The 35 × 265 mm entry slot is designed for DIN C4 items in portrait format. A noise-damping rubber lip reduces the impact noise of the entry flap. Mail is retrieved from the front; the access doors open from left to right. Each mailbox is supplied with two numbered keys and a replaceable nameplate beneath the entry flap.

The advantages of the BASIC 385P mailbox system at a glance

Solid aluminium upright posts

Solidly manufactured, anodised aluminium profiles form the stable base of the freestanding unit. The powder-coated construction combines high load capacity with a durable design for outdoor use.

DIN C4 entry with 12-litre volume

The mailboxes each offer approximately 12 litres of mail volume. The 35 × 265 mm entry slot accepts DIN C4 items in portrait format without larger envelopes needing to be unnecessarily folded.

Quiet insertion and reliable operation

Rubber lips dampen the entry flaps. Robust locks, two keys per compartment and protected replaceable nameplates are designed for daily use in multi-occupancy properties.

Bolted installation or concreting

Depending on the chosen version, the aluminium upright posts are bolted to a load-bearing foundation or permanently concreted in. This allows the unit to be installed to suit the structural situation.

Robust BASIC quality in RAL 9016 Traffic White

Galvanised steel, stainless steel components, solid aluminium upright posts and German manufacturing result in a resilient mailbox system for long-term use at the property entrance.

Equipment of the BASIC 385P mailbox system

Mailbox unit

Number of mailboxes 15 separate mail compartments
Mailbox dimensions 300 × 110 × 385 mm (W × H × D) per compartment
Mail volume Approx. 12 litres per mailbox
Material Galvanised steel; side cladding and rain canopy made of stainless steel V2A
Finish RAL 9016 Traffic White, fine-textured matt
Entry slot 35 × 265 mm, suitable for DIN C4 portrait
Standard Mailboxes conforming to DIN EN 13724

Mail and operation

Letter flaps With noise-damping rubber lip
Mail retrieval From the front
Door opening Left to right
Keys 30 keys in total, 2 per mailbox
Nameplates 15 replaceable nameplates beneath the letter flaps
Rain drainage Integrated rain gutters

Solid aluminium upright posts

Stand posts Solidly manufactured, anodised aluminium profile
Coating Powder-coated in RAL 9016 Traffic White
Mounting options Either bolted installation or concreting in
Bolted installation Stand posts available in 1200 or 1600 mm
Concreting Stand posts available in 1600 or 2000 mm
Condition on delivery Stand posts and mailbox unit delivered in assembly-friendly sections
Manufacture Made in Germany by Briefkasten Manufaktur Lippe

Installation on a foundation

For bolted installation a level and sufficiently load-bearing foundation is required. Fixings should be selected to suit the foundation, the weight of the unit and the local installation situation.

Installation by concreting

For the concreting version the extended aluminium stand posts are anchored plumb into a suitably dimensioned concrete foundation. Foundation size and embedment depth should be matched to ground conditions, unit dimensions and local loads.

Note on weather protection

The rain canopy, close-fitting side cladding and rain gutters support weather protection. Mail items must be fully inserted so that the letter flaps can close completely. In extreme weather conditions, small amounts of moisture may penetrate despite compliant construction.

Product properties

Material	Steel, galvanised, Aluminium AlMg3 W19, Stainless steel V2A 1.4301
Series	BASIC
Boxes by volume	Normal > 10 litres
Name labelling	Nameplate
Mounting type	Free-standing
Number of boxes	with 15 letterboxes
Removal of mail	On the front
Surface/colour	RAL 9016 traffic white

Dimensions

Height in mm	1
Height of single box in mm	110.0
Width of single box in mm	300.0
Capacity in litres	12
Height of letterbox slot in mm	35.0
Width of letter slot in mm	265.0
Height of letterbox in mm	550.0
Width of letterbox system in mm	900.0
Overall height in mm	1200.0 | 1600.0
Total width in mm	980.0
Depth in mm	435.0
Weight in kg	93
Delivery condition	Delivery is in blocks, freestanding elements / mailbox delivered separately.
