6-unit (3x2) freestanding mailbox system Design BASIC 385220 7016 ST-R - RAL 7016 anthracite grey | RAL 7016 Anthracite grey, fine texture, matt | 300x220x385 mm (WxHxD) - ???? Large 25 litres | with 6 letterboxes (2x3)

Product number 385220-7016-6S

Product description

Freestanding mailbox system BASIC 385220 for 6 households – narrow version – RAL 7016 Anthracite grey

The freestanding BASIC 385220 mailbox system for 6 households is designed for a particularly generous mail capacity. The 220 mm deep mailboxes each offer approx. 25 litres of volume per compartment, making them suitable for apartment buildings, residential complexes and commercial properties with regular letter, catalogue or magazine deliveries.

The mailboxes are made of galvanised steel and are powder-coated in RAL 7016 Anthracite grey with a fine-textured matt finish. A rain canopy and side panels combine the individual compartments into a closed, streamlined overall unit.

The slim S-version uses the available system width especially efficiently and arranges the large-capacity mail compartments in a more vertically oriented configuration.

Each compartment has a 35 × 265 mm aperture for DIN C4 items in portrait format. A noise-damping rubber lip reduces impact noise; mail is retrieved from the front via doors that open from left to right. Each mailbox is supplied with two keys with key numbers and a changeable nameplate.

Benefits of the BASIC 385220 at a glance

Solid stainless steel support posts

Round-tube support posts with approx. 60 mm diameter made of brushed stainless steel V2A 1.4301 form a stable base for the freestanding mailbox system. The robust construction is designed for permanent use at the property entrance.

Large-capacity 220 mm version

With approx. 300 × 220 × 385 mm per mailbox, the BASIC 385220 offers around 25 litres of mail volume. This is particularly practical for higher mail volumes or longer collection intervals.

Large aperture according to DIN EN 13724

The aperture measuring 35 × 265 mm is designed for DIN C4 items in portrait format. Larger envelopes can also be posted without having to be folded.

Screw mounting or embedding in concrete

Depending on the version, the stainless steel support posts are either bolted to a load-bearing foundation or permanently cast into concrete. This allows the system to be installed to suit the structural situation.

Robust large-capacity system Made in Germany

The combination of galvanised steel, large 25-litre compartments, solid stainless steel support posts and assembly-friendly construction makes the BASIC 385220 a particularly robust solution for daily use.

Equipment of the BASIC 385220 mailbox system

Mailbox system

Number of mailboxes 6 separately usable mail compartments
Design Slim, vertically oriented freestanding system
Material of mailboxes Galvanised steel
Finish RAL 7016 Anthracite grey, fine-textured matt
Mailbox size Approx. 300 × 220 × 385 mm per compartment
Mail volume Approx. 25 litres per mailbox
Manufacture Made in Germany by Briefkasten Manufaktur Lippe

Mail and operation

Aperture 35 × 265 mm, suitable for DIN C4 portrait
Aperture flaps With noise-damping rubber lip
Mail retrieval From the front
Door opening Opens from left to right
Keys 2 keys with key number per mailbox
Nameplate Changeable nameplate beneath the aperture flap
Standard Mailboxes compliant with DIN EN 13724

Support posts and equipment

Support posts Round-tube approx. 60 mm made of stainless steel V2A 1.4301, brushed
Mounting options Optionally for screw mounting or embedding in concrete
Anchor bolts Not included for screw mounting; select suitable anchor bolts separately to match the foundation
Rain canopy / side panels Galvanised steel, powder-coated in RAL 7016 Anthracite grey, fine-textured matt

25 litre mail volume

The BASIC 385220 uses the deep mailbox configuration measuring approx. 300 × 220 × 385 mm, providing around 25 litres per compartment. The extra capacity is especially suitable for regular deliveries of letters, magazines and catalogues and for longer collection intervals.

Installation by embedding in concrete

For the freestanding mailbox system we recommend a suitably dimensioned concrete foundation. The stainless steel support posts must be aligned plumb and permanently anchored in the foundation. Foundation size and embedment depth should be adapted to ground conditions, system weight and local circumstances.

Screw mounting on a foundation

For screw mounting, a flat and load-bearing concrete foundation is required. Suitable anchor bolts or equivalent fixings must be selected to suit the substrate and the load on the system. Anchor bolts are not part of the standard delivery.

Note on weather protection

Mail is best protected from moisture and dirt when items are fully inserted and the flap is closed. Protruding items can prevent the flap from closing completely. Under extreme weather conditions, moisture may enter the mailbox despite compliant construction.

Product properties

Material	Steel, galvanised
Series	BASIC
Number of boxes	with 6 letterboxes
Name labelling	Nameplate
Mounting type	Free-standing
Surface/colour	RAL 7016 anthracite grey, Brushed
Removal of mail	On the front
Boxes by volume	Large > 16 litres
