Designer mailbox column GOETHE with newspaper compartment - RAL colour of your choice - prepared for LOXONE Intercom/Code Touch | Prepared for a 1x1 LOXONE Intercom

Product number 215-STL-160-1ZFS-LX-LOX1

Product description

Designer mailbox column GOETHE with newspaper compartment - RAL of choice - LOXONE Intercom/Code Touch prepared

High-quality manufactured mailbox column with newspaper compartment in a flush design. The modern GOETHE mailbox is ideal for demanding entrance areas. The linear design without a visible lock gives this mailbox a particularly elegant appearance. The LOXONE Intercom can be integrated seamlessly into the flush design and exchanged at any time. The preparation is intended for 1 × LOXONE Intercom (including opening for sound emission) or 1 × LOXONE Intercom (including opening for sound emission) + 1 × LOXONE NFC Code Touch/Touch Pure.

The dimensions of the individual compartment provide a capacity of approx. 16 litres; the large opening ensures that DIN C4 envelopes and magazines, or post accumulated during several days away, will not be crumpled. The innovative Push-Key lock is hidden invisibly inside the mailbox. The key is simply inserted into the existing opening (no turning required) and the door opens. The arrangement of the lock is designed so that the collection door prevents your post from falling towards you. Thanks to the water-drip edge, the internal post is optimally protected from the weather. The letter flap is fitted with high-quality hinge dampers, ensuring very quiet closing and preventing rattling caused by weather influences.

The GOETHE mailbox systems are characterised by the consistent use of stainless steel and aluminium. The result is very high durability and sustainability. The construction has been developed by our own engineers with a view to high flexibility and modularity, simple spare-part assembly and straightforward self-installation. Spare parts for all GOETHE systems are available directly in our shop.

Thanks to the construction design, self-installation is uncomplicated.

Protected utility model according to DPMA file reference DE: 20 2021 101 679.5

- High-quality mailbox column made of stainless steel and aluminium.
- Quality manufacturing - Made in Germany by Briefkasten Manufaktur Lippe.
- Mailbox (BH 400x400mm) made of stainless steel 1.4016 (corrosion-resistant magnetic stainless steel), powder-coated in RAL of your choice.
- Innovative Push-Key lock with 2 keys.
- Letters are inserted and removed from the front. Letter flap with high-quality hinge dampers for very quiet insertion of post.
- The mailbox conforms to DIN/EN 13724. Insertion size (3.5 cm x 36.0 cm) for C4 landscape; large envelopes fit in without folding.
- Collection door opens from top to bottom. This prevents your post from falling out towards you.
- Optional name inscription approx. 15-20 mm high.
- Optional house number inscription approx. 70-80 mm high.
- Newspaper compartment (BH 400x200mm) made of stainless steel 1.4016 (corrosion-resistant magnetic stainless steel), powder-coated in RAL of your choice with stainless steel laser inscription "NEWSPAPER" (font ARIAL; if name/house number, then in your chosen font).
- Newspaper compartment opens from bottom to top.
- Function compartment (BH 400x200mm) made of stainless steel 1.4016 (corrosion-resistant magnetic stainless steel), powder-coated in RAL of your choice.
- Optimal protection from rain thanks to drip edges and a rain hood made of 3 mm aluminium AlMg3 W19, powder-coated in RAL of your choice.
- Side cladding made of 3 mm aluminium AlMg3 W19, powder-coated in RAL of your choice.
- Rear panel and base plate made of 6 mm aluminium AlMg3 W19, powder-coated in RAL of your choice.
- Invisible fixing in the column via reinforced base plate.
- Invisible cable feed through the body is possible. The overall height is 1.65 m.
- **WITHOUT LOXONE Intercom/System components!**

Important information

Camera or intercom preparation

We always recommend that electrical installation be carried out by a qualified electrician.

We offer preparations for intercom stations from various manufacturers for our mailboxes. The preparation does not include end devices; it comprises the provision of screw mounts, drillings and cut-outs so that you can mount your device without difficulty.

Water protection

To achieve optimal water protection for your post, the mailbox or mailbox system should, where possible, be positioned under a canopy.

Post is protected from water only if it is placed completely inside the box and the letter flap is closed. Partially inserted post allows moisture and dirt to enter the mailbox. This system is protected against ingress of water in accordance with DIN EN 13724. Water ingress is not a valid reason for a complaint.
