Designer wheelie bin enclosure ARENDT for 3 wheelie bins – RAL 7016 Anthracite grey | 3-fold

Product number 351-3

Product description

ARENDT wheelie bin enclosure for 3 wheelie bins – organised waste separation in a single unit

The ARENDT wheelie bin enclosure for 3 wheelie bins combines three waste bins into a streamlined, visually unified unit. It is particularly suitable for households and properties where multiple waste fractions are to be housed at a single location.

Each wheelie bin remains independently accessible via its own front door and a separate top lid. Gas struts support comfortable lid operation in everyday use.

The construction is made from galvanised steel with a material thickness of approx. 0.8 mm and is powder-coated in RAL 7016 anthracite grey. Ventilation openings in the doors support air exchange within the individual compartments.

The advantages of the ARENDT wheelie bin enclosure at a glance

Three waste bins neatly housed

Three wheelie bins are combined within a single unit. This is particularly suitable for the organised housing of different waste fractions.

Robust construction of galvanised steel

Galvanised steel forms the stable material base of the unit. The construction is designed for long-term outdoor use.

RAL 7016 Anthracite grey

The anthracite grey powder coating provides a modern, understated surface and a consistent appearance across all three modules.

Three convenient top lids

Each wheelie bin has its own top lid with a gas strut. This allows all three bins to be conveniently filled from above independently of each other.

Separate access to each wheelie bin

Three separate front doors allow individual placement and removal of the wheelie bins. Other bins do not need to be moved for this.

Equipment of the ARENDT wheelie bin enclosure

Construction and finish

Configuration For 3 wheelie bins
Suitable wheelie bins 60 / 120 / 240 litres per bay
Material Galvanised steel
Material thickness approx. 0.8 mm
Finish RAL 7016 anthracite grey, powder-coated

Ease of use

Access 3 separately operable front doors
Filling 3 separate top lids
Lid assistance Gas struts with 80 N per lid unit
Ventilation Ventilation openings in the front doors
Operation All three bays operable independently of each other

Assembly and scope of delivery

Type of installation Freestanding installation with ground fixings
Mounting material Included in the delivery
Instructions Assembly and operating instructions included
Application areas House, residential property, front garden and outdoor areas

Note on ground fixing

The wheelie bin enclosure should be placed on a level and sufficiently load-bearing surface. Fixings and ground anchoring should be selected according to the existing substrate and, if necessary, adapted to local conditions.

Note on use

Each wheelie bin must be able to be positioned and removed freely. After installation, check that the three top lids move freely and that they connect correctly with the respective bin lids.
