Designer wheelie bin enclosure ARENDT for 1 wheelie bin – RAL 7016 Anthracite grey | 1-fold

Product number 351-1

Product description

ARENDT wheelie bin store for 1 wheelie bin – compact, convenient and streamlined

The ARENDT wheelie bin store for 1 wheelie bin provides a fixed, visually tidy parking space for a refuse container. The enclosed design largely conceals the wheelie bin and, with its powder-coated finish in RAL 7016 anthracite grey, integrates harmoniously into modern entrance areas, front gardens and driveways.

The store is suitable for common wheelie bins with a capacity of 60, 120 or 240 litres. A large front door allows the wheelie bin to be placed and removed comfortably. For filling, a separate top lid with a gas strut is provided.

The construction is made of galvanised steel with a material thickness of approx. 0.8 mm. Ventilation openings in the door support air exchange within the store. Due to its modular design, the ARENDT unit can be combined and extended with additional boxes if required.

The advantages of the ARENDT wheelie bin store at a glance

Order for the outdoor area

The wheelie bin is concealed behind a streamlined cladding and gains a clearly defined parking space. This makes the bin area appear significantly calmer and tidier.

Robust construction of galvanised steel

The cladding is made of galvanised steel with a material thickness of approx. 0.8 mm. The construction is designed for outdoor use and combines stability with a clear design language.

RAL 7016 anthracite grey

The powder-coated surface in RAL 7016 anthracite grey provides a modern and cohesive appearance and helps protect the metal surface from typical weathering effects.

Automatic lid with gas strut

The top lid is supported by a gas strut. This allows the store to be opened comfortably and closed in a controlled manner. The coupling with the wheelie bin lid enables practical operation from above.

Modularly expandable

Via the provided connection points, the ARENDT single unit can be combined with further modules. This allows the bin area to be extended afterwards if additional capacity is required.

Equipment of the ARENDT wheelie bin store

Construction and finish

Configuration For 1 wheelie bin
Suitable wheelie bins 60 / 120 / 240 litres
Material Galvanised steel
Material thickness approx. 0.8 mm
Finish RAL 7016 anthracite grey, powder-coated

User convenience

Access 1 front door
Filling Via separate top lid
Lid support 80 N gas strut
Ventilation Ventilation openings in the front door
Expandability Can be combined with further ARENDT modules

Installation and scope of delivery

Installation type Freestanding installation with floor fixings
Fixings Included in delivery
Instructions Assembly and operating instructions included
Areas of use Entrance area, front garden and outdoor areas

Note on floor fixings

The wheelie bin store must be placed on a level and sufficiently load-bearing surface. Fixings and floor fastenings should be selected according to the existing subsoil and adapted to local conditions where necessary.

Note on use

After installation, the free movement of the top lid and the connection with the wheelie bin lid should be checked. Hinges and closing edges must be kept clear during operation.
