Designer flush-mounted mailbox with shadow-gap frame GOETHE UP - RAL colour of your choice | 100mm depth

Product number 215-UPSF-1-100

Product description

Designer recessed letterbox with shadow gap frame GOETHE UP - RAL colour of your choice

The modern recessed letterbox GOETHE® with shadow gap frame is ideal for an upscale entrance area. Its clean-lined design without a visible lock gives this letterbox an especially elegant appearance. Thanks to the aluminium shadow gap frame, this letterbox can be fully recessed into the wall. This method of installation allows a seamless and elegant integration into your building's façade.

The dimensions of the individual box provide a capacity of approx. 16 or 32 litres; the large aperture ensures that DIN-C4 envelopes and magazines — or mail accumulated during several days' absence — do not become creased. The innovative Push-Key lock is hidden invisibly inside the letterbox. The key is simply inserted into the existing opening (no turning required) and the door opens. The arrangement of the lock is designed so that the retrieval door prevents your mail from falling out towards you. The internal mail is optimally protected from the weather by the water-drip edge. The letter flap is fitted with high-quality hinge dampers, ensuring a quiet closing and preventing annoying rattling due to weather influences.

The letterbox systems of the GOETHE® collection are characterised by the consistent use of stainless steel and aluminium. The result is very high durability and sustainability. The construction has been developed by our own engineers with regard to high flexibility and modularity, easy spare-part installation and straightforward self-installation. Spare parts for all GOETHE® systems are available directly from our shop.

Thanks to the design, self-installation is straightforward.

Important information:

To achieve optimal protection of your mail from water, the letterbox or letterbox system should, if possible, be located beneath a canopy.

Mail is only protected from water if it is placed completely inside the box and the letter flap is closed. Mail that is not fully inserted allows moisture and dirt to enter the letterbox. This system is protected against water ingress according to DIN EN 13724. Water ingress is not grounds for complaint.
