Freestanding mailbox STORM for 6 households – 2-column – RAL 7016 anthracite grey | RAL 7016 Anthracite grey, fine texture, matt | with 6 letterboxes (2x3)

Product number 480STQ-6S-7016

Product description

Freestanding STORM mailbox system for 6 occupants – high-quality solution for limited width

The STORM freestanding mailbox system for 6 occupants combines a clear, modern design with very high material and manufacturing quality. Two columns and three rows use the available area efficiently in height and create six clearly assigned mail compartments. The system is designed as a durable entrance solution for residential and commercial properties and is manufactured by Briefkasten Manufaktur in Germany.

The mailboxes, the rain hood and the side claddings are made of **high-quality galvanised steel** and are **powder-coated in RAL 7016 Anthracite grey, fine-textured matt**. Complementing this, the **40 × 40 mm stand posts in stainless steel V2A 1.4301, brushed** provide an intentionally high-quality material contrast. The combination of the finely textured anthracite-grey surface and brushed stainless steel defines the quality character of the STORM series.

Each mailbox has a 35 × 340 mm insertion opening for DIN C4 mail in landscape format. Noise-dampening rubber buffers, a downward-opening collection door with an opening stop, a mail-retaining bracket and two keys with key number per mailbox ensure comfortable use. The mailboxes comply with DIN EN 13724.

The advantages of the STORM freestanding mailbox system at a glance

Ideal for apartment buildings with limited width

Six independent mailboxes, standard-compliant design and German quality manufacturing make this STORM system a high-quality solution for apartment buildings. The narrower overall width is particularly interesting where only limited horizontal space is available at the property entrance.

Very high material quality of the mailboxes

All 6 mailboxes as well as the rain hood and side claddings are manufactured from galvanised steel. The powder coating in RAL 7016 Anthracite grey, fine-textured matt produces a high-quality, homogeneous surface and emphasises the system’s linear architecture.

High-quality stand posts in brushed stainless steel

The 40 × 40 mm sturdy stand posts are made from stainless steel V2A 1.4301 and have a brushed finish. The high-quality stainless steel forms the robust base of the system and provides a deliberately elegant contrast to the anthracite-grey mailbox surface.

DIN C4 insertion and comfortable mail retrieval

All mailboxes have a 35 × 340 mm insertion opening for DIN C4 envelopes in landscape format. Rubber buffers reduce impact noise; the opening stop and mail-retaining bracket support comfortable retrieval.

Freestanding and flexible to plan

Due to the system height and overall weight, professional anchoring in or on a suitably dimensioned foundation is required. For bolted installation, the appropriate anchor bolts must be selected separately according to the foundation and local installation conditions.

Equipment and high-quality materials

Mailbox and finish

Number of mailboxes 6 separately lockable mailboxes
Arrangement 2 columns × 3 rows
Mailbox material Steel, galvanised
Mailbox finish RAL 7016 Anthracite grey, fine-textured matt, powder-coated
Rain hood and side cladding Galvanised steel, RAL 7016 Anthracite grey, fine-textured matt
Standard Mailboxes in accordance with DIN EN 13724

Mail handling

Insertion opening 35 × 340 mm per mailbox, suitable for DIN C4 landscape
Insertion flaps With high-quality, noise-dampening rubber buffers
Mail retrieval Front-facing, door opens downward with opening stop
Mail-retaining bracket Integrated in each mailbox
Keys 12 keys in total, 2 per mailbox, with key number
Nameplates 6 protected changeable nameplates under the insertion flaps

Stand posts and installation

Stand post material Stainless steel V2A 1.4301
Cross-section 40 × 40 mm
Stand post finish Brushed stainless steel
Installation types Optional for casting into concrete or for bolted installation
Anchor bolts Not included for bolted installation; to be selected separately to match the foundation

Manufacture Made in Germany by Briefkasten Manufaktur Lippe

Installation by casting into concrete

The stainless steel stand posts must be anchored vertically in a suitably dimensioned foundation. Foundation size and design must be matched to ground conditions, system weight and local loads.

Bolted installation on a foundation

For bolted installation a level and load-bearing foundation is required. The required anchor bolts are not included and must be selected separately to match the existing foundation design.

Note on weather protection

For the best possible protection, mail items must be fully inserted so that the insertion flaps can close completely. A sheltered location further reduces direct exposure to the elements.

Product properties

Material	Steel, galvanised
Series	STORM
Number of boxes	with 6 letterboxes
Boxes by volume	Normal > 10 litres
Mounting type	Free-standing
House number	House number as laser engraving
Surface/colour	RAL 7016 anthracite grey
Name labelling	Laser-engraved
Removal of mail	On the front
