6-unit freestanding mailbox Design BASIC 385-9016 ST-R with doorbell box - RAL 9016 traffic white | RAL 9016 Traffic White, fine-textured matt | Right | with 6 letterboxes

Product number 385-9016-6W-SP-R

Product description

Freestanding 6-unit mailbox system BASIC 385 for 6 households – wide, multi-column version with bell/intercom module – bell panel on the right – RAL 9016 Traffic white

For multi-family houses, smaller residential developments as well as office and medical practice buildings, the freestanding BASIC 385 as a system for 6 households offers a durable and clear entrance solution. The independent freestanding installation allows the mailbox system to be positioned to suit the plot and access situation.

The W variant distributes the mailboxes in a wider, multi-column arrangement and creates a clear front for multiple users.

The mailboxes are made of galvanised steel and receive a powder coating in RAL 9016 Traffic white, fine-textured matt. A close-fitting side cladding with a rain canopy unites the individual mailboxes into a single compact unit.

Each compartment features an insertion opening of 35 × 265 mm for DIN-C4 items in portrait format. A sound-dampening rubber lip reduces impact noise, while the front access doors open from left to right. Each mailbox is supplied with two keys with key number and an interchangeable nameplate beneath the mail slot.

The integrated bell/intercom module on the right consolidates the doorbell function and preparation for an intercom system directly in the mailbox unit.

The advantages of the BASIC 385 at a glance

Solid stainless-steel stand posts

Round-tube stand posts with approx. 60 mm diameter in brushed stainless steel V2A 1.4301 form a stable base for the freestanding mailbox system. The robust construction is designed for permanent use at the property entrance.

Large mail slot to DIN EN 13724

The insertion opening of 35 × 265 mm is designed for DIN C4 items in portrait format. Larger envelopes can also be inserted without folding.

Quiet insertion and comfortable retrieval

A sound-dampening rubber lip reduces the impact of the mail flap. Mail is retrieved at the front via doors that open from left to right.

Bright finish in RAL 9016

RAL 9016 Traffic white, fine-textured matt provides a clear, bright appearance and offers long-lasting protection for the galvanised steel construction.

Bell/intercom module integrated directly

The bell/intercom panel on the right is integrated directly into the mailbox system.

Equipment of the BASIC 385 mailbox system

Mailbox system

Construction type Wide, multi-column version
Number of mailboxes 6 separately usable mail compartments
Mailbox material Galvanised steel
Finish RAL 9016 Traffic white, fine-textured matt
Rain canopy / side cladding Galvanised steel, powder coated in RAL 9016 Traffic white, fine-textured matt
Manufacture Made in Germany by Briefkasten Manufaktur Lippe

Mail and operation

Mail slot 35 × 265 mm, suitable for DIN C4 portrait
Mail slot flaps With sound-dampening rubber lip
Mail retrieval Front
Door opening Opens from left to right
Keys 2 keys with key number per mailbox
Nameplate Interchangeable nameplate below the mail slot
Standard Mailboxes compliant with DIN EN 13724

Stand posts and equipment

Stand posts Round tube approx. 60 mm in stainless steel V2A 1.4301, brushed
Installation methods Optionally for bolted installation or for concreting in
Fastening Anchor bolts for bolted installation not included; select separately to suit the foundation
Bell/intercom module Integrated functional panel, position: right
Intercom preparation Talk-hole with universal adapter for common built-in speakers
Doorbell push-buttons Round stainless-steel doorbell push-buttons matching the product design

Mailbox size and volume

The BASIC 385 is available with different mailbox sizes depending on the product configuration. The standard version 300 × 110 × 385 mm offers approx. 12 litres volume; depending on the variant, 300 × 220 × 385 mm with approx. 25 litres volume is also available.

Installation by concreting in

For the freestanding system we recommend a suitably dimensioned concrete foundation. When concreting in, the stainless-steel stand posts must be set plumb and permanently anchored in the foundation. Foundation size and embedment depth must be matched to ground conditions, system weight and local circumstances.

Bolt-down installation on a foundation

For bolted installation a flat, load-bearing concrete foundation is required. Suitable anchor bolts or fixing materials must be selected to suit the substrate and the system load. For the BASIC-385-ST-R versions, anchor bolts are not included in the standard scope of delivery.

Note on weather protection

Postal items are best protected from moisture and dirt only when fully inserted and with the mail flap closed. Protruding items can prevent the flap from closing completely. In extreme weather conditions, moisture may enter the mailbox despite norm-compliant design.

Note on bell and intercom technology

The bell/intercom module is prepared with a talk-hole and universal adapter for common built-in speakers. Two-way intercom systems or built-in speakers are not part of the standard equipment. Planning, connection and commissioning of electrical components should be carried out by a qualified electrician.

Product properties

Material	Steel, galvanised, Stainless steel V2A 1.4301
Series	BASIC
Number of bell push buttons	6 buttons
Functions	Light button, Intercom
Functional box prepared for manufacturer	GIRA, Busch Jaeger, Siedle, STR Elektronik, ELCOM, TCS, Ritto, ALGO, Telegärtner, Auerswald, Legrand Bticino, Comelit
Number of boxes	with 6 letterboxes
Boxes by volume	Normal > 10 litres
Name labelling	Nameplate
Mounting type	Free-standing
Removal of mail	On the front
Surface/colour	RAL 9016 traffic white
