9-unit stainless steel freestanding mailbox Design BASIC Plus 385XP ST-T with bell box - RAL colour of your choice | Left | ? Colour of your choice | with 9 mailboxes

Product number 385XP-9S-SP-L

Product description

Freestanding mailbox system BASIC Plus 385XP ST-T with bell/intercom module for 9 residents – bell module left / S arrangement

The freestanding BASIC Plus 385XP ST-T mailbox system for 9 residents combines robust stainless steel mailboxes with an integrated bell/intercom module. Mailbox system and visitor communication are thus brought together in a stable, visually unified entrance solution for larger multi-family houses, residential complexes and commercial properties. In this version the bell/intercom module is positioned on the left.

The mailboxes are made from stainless steel V2A and are high-quality powder-coated in a RAL colour of choice. Particularly noteworthy are the solid support elements made from anodised aluminium profile: these are also powder-coated, very robust and form an exceptionally sturdy base for the entire mailbox system. Stainless steel and solid aluminium combine longevity with a clear, high-quality architectural aesthetic.

Each mailbox measures 300 × 110 × 385 mm (W × H × D) and offers approx. 12 litres of capacity. The 35 × 265 mm insertion aperture is designed for DIN C4 items in portrait format. A noise-damping rubber lip on the flap, front access for mail retrieval, a robust lock and the interchangeable nameplate ensure convenient everyday use.

The advantages of the BASIC Plus 385XP ST-T system at a glance

Mailbox and bell in a single unit

9 mailbox compartments are combined with a bell/intercom module. This reduces additional separate components at the property entrance and provides a tidy overall appearance.

Solid aluminium support elements

Solidly manufactured, anodised aluminium profiles form the particularly robust base of the system. The powder-coated profile construction is designed for high stability and long-term outdoor use.

DIN C4 insertion with 12-litre capacity

The 300 × 110 × 385 mm mailboxes each offer approx. 12 litres of mail capacity. The 35 × 265 mm insertion aperture accepts DIN C4 mail in portrait format.

Bell/intercom module prepared

The integrated bell/intercom module provides a central location for doorbell buttons and the integration of compatible intercom technology. The electrical components are executed to suit the planned system.

BASIC Plus – built for heavy-duty use

The consistent combination of stainless steel V2A and solid aluminium profiles makes the 385XP an especially robust mailbox system. The modular construction simplifies installation, maintenance and the later replacement of individual components.

Equipment of the BASIC Plus 385XP ST-T mailbox system

Mailbox system

Number of mailboxes 9 separately lockable mailbox compartments
Individual mailbox 300 × 110 × 385 mm (W × H × D)
Mail capacity Approx. 12 litres per mailbox
Mailbox material Stainless steel V2A, powder-coated in a RAL colour of choice
Insertion aperture 35 × 265 mm, suitable for DIN C4 portrait
Manufacture Made in Germany by Briefkasten Manufaktur Lippe

Mail and additional functions

Bell/intercom module Integrated into the mailbox system
Position Left
Doorbell buttons Matched to the number of residents
Intercom technology Preparation for a compatible door communication solution
Electrical connection To be provided on site according to the selected intercom system
Note Intercom system and connection components depend on the chosen configuration

Solid aluminium support elements

Support elements Solid anodised aluminium profile, powder-coated
Construction Designed to be particularly robust and load-bearing
Surface RAL colour matching the mailbox system
Installation Freestanding installation on a suitable foundation
Side cladding Close-fitting design
BASIC Plus Modular, maintenance-friendly and designed for installation

Note on the bell/intercom module

The specific intercom technology, power supply and cabling depend on the chosen door communication solution. Installation and connection should be carried out by suitably qualified professionals.

Foundation and secure installation

The solid aluminium support elements require a level and sufficiently load-bearing substrate or an appropriately dimensioned concrete foundation. Foundation size, fastening and alignment must be matched to the system weight, size, ground conditions and local loads.

Note on weather protection

A rain hood, close-fitting side cladding and rainwater gutters support weather protection. Mail items must be fully inserted so that the insertion flaps can close completely.

BASIC Plus – robust and modular

The BASIC Plus construction relies on stainless steel V2A and solid aluminium profiles. The modular design simplifies installation and the later replacement of individual components and is engineered for a long service life.

Product properties

Surface/colour	RAL 9005 deep black, RAL 3004 crimson red, DB 703 iron mica, RAL 7016 anthracite grey, RAL of your choice (according to colour table), RAL 9007 grey aluminium, RAL 9016 traffic white
Series	BASIC
Number of bell push buttons	9 buttons
Functions	Light button, Intercom
Functional box prepared for manufacturer	GIRA, Busch Jaeger, Siedle, STR Elektronik, ELCOM, TCS, Ritto, ALGO, Telegärtner, Auerswald, Legrand Bticino, Comelit
Number of boxes	with 9 letterboxes
Boxes by volume	Normal > 10 litres
Name labelling	Nameplate
Material	Aluminium AlMg3 W19, Stainless steel V2A 1.4301
Mounting type	Free-standing
Removal of mail	On the front
