8-unit freestanding mailbox system Design BASIC 385P-7016-SP with bell/intercom module incl. side cladding & rain hood - horizontal mailboxes - Anthracite grey RAL 7016 | RAL 7016 Anthracite grey, fine texture, matt | Left | with 8 mailboxes

Product number 385P-7016-8S-SP-L

Product description

Freestanding mailbox system BASIC 385P with bell/intercom unit left for 8 households – RAL 7016 Anthracite grey – narrow version

The freestanding BASIC 385P mailbox system for 8 households combines 8 separately usable mail compartments with an integrated bell function box. This brings together mail reception, doorbell buttons and preparation for a compatible door intercom in a robust, visually cohesive entrance solution for larger apartment blocks, residential complexes and commercial properties. In this variant, the bell/intercom unit is positioned to the left of the mailbox system.

The mailboxes are made from galvanised steel and are powder-coated in RAL 7016 Anthracite grey with a fine-textured matt finish. A close-fitting side panel with canopy and integrated rain channels support weather protection. The solid support posts made from anodised aluminium profile are also powder-coated in RAL 7016 Anthracite grey and provide a particularly stable, durable base for the freestanding system.

Each of the 8 mailboxes has approx. 12 litres capacity. The 35 × 265 mm mail slot is designed for DIN C4 items in portrait format. A noise-damping rubber lip reduces the impact of the mail flap. Mail is retrieved from the front; the access doors open from left to right. Each mailbox is supplied with two keys with key number and a changeable nameplate beneath the mail slot.

The advantages of the BASIC 385P mailbox system at a glance

Integrated bell function box on the left

The system combines 8 mailboxes with 8 stainless steel doorbell buttons and a speaker opening with universal adapter. This creates a central, tidy solution for mail and visitor communication.

Solid aluminium support posts

Solidly manufactured anodised aluminium profiles form the stable base of the freestanding system. The powder-coated construction combines high load capacity with a long-lasting exterior finish.

DIN C4 mail slot with 12-litre capacity

The mailboxes each offer approx. 12 litres of capacity. The 35 × 265 mm opening accepts DIN C4 items in portrait format without the need to fold larger envelopes unnecessarily.

Prepared for door communication

The speaker opening with universal adapter is prepared for many commercially available flush-mounted speakers.

Robust BASIC quality in RAL 7016 Anthracite grey

Galvanised steel, stainless steel components, solid aluminium support posts and German manufacture result in a resilient mailbox system for permanent use at the property entrance.

Equipment of the BASIC 385P mailbox system

Mailbox system

Number of mailboxes 8 separately usable mail compartments
Mailbox dimensions 300 × 110 × 385 mm (W × H × D) per compartment
Mail capacity Approx. 12 litres per mailbox
Material Galvanised steel; side panel and canopy made from stainless steel V2A
Finish RAL 7016 Anthracite grey fine-textured matt
Mail slot 35 × 265 mm, suitable for DIN C4 portrait
Standard Mailboxes conforming to DIN EN 13724

Bell and intercom unit

Bell function box Galvanised steel, powder-coated to match
Position Left
Doorbell buttons 8 round stainless steel doorbell buttons, type 4
Speaker opening With universal adapter for commercially available flush-mounted speakers
Nameplate Resistant to indentation and impact

Solid aluminium support posts

Support posts Solidly manufactured anodised aluminium profile
Coating Powder-coated in RAL 7016 Anthracite grey
Installation options Either screw mounting or concreting-in
Screw mounting Support posts available in 1200 or 1600 mm
Concreting-in Support posts available in 1600 or 2000 mm
Delivery condition Support posts and mailbox system delivered in parts suitable for assembly
Manufacture Made in Germany by Briefkasten Manufaktur Lippe

Note on the bell/intercom unit

Briefkasten Manufaktur Lippe GmbH

The universal adapter is suitable for many commercially available flush-mounted speakers. Intercom systems or flush-mounted speakers, power supplies and cabling are not part of the described basic equipment and must be provided to suit the planned system.

Installation on a foundation

For screw mounting, a level and sufficiently load-bearing foundation is required. Fasteners must be selected to suit the foundation, system weight and local installation conditions.

Installation by concreting in

For the concreting-in version, the extended aluminium support posts are anchored vertically in a suitably sized concrete foundation. Foundation size and embedment depth must be adapted to ground conditions, system dimensions and local loads.

Note on weather protection

The canopy, closely fitting side panels and rain channels enhance weather protection. Mail items must be fully inserted so that the flaps can close completely. Under extreme weather conditions, small amounts of moisture may penetrate despite norm-compliant construction.

Product properties

Material	Steel, galvanised, Aluminium AlMg3 W19, Stainless steel V2A 1.4301
Series	BASIC
Number of bell push buttons	8 buttons
Functions	Light button, Intercom
Functional box prepared for manufacturer	GIRA, Busch Jaeger, Siedle, STR Elektronik, ELCOM, TCS, Ritto, ALGO, Telegärtner, Auerswald, Legrand Bticino, Comelit
Boxes by volume	Normal > 10 litres
Name labelling	Nameplate
Mounting type	Free-standing
Surface/colour	RAL 7016 anthracite grey
Removal of mail	On the front
Number of boxes	with 8 letterboxes
