Radio chime Bluetooth microSD battery Language German white CALIMA + radio transmitter UP - for mechanical buttons

Product number 1249-800E-UP

Product description

Wireless chime Bluetooth microSD rechargeable battery Language German white CALIMA + wireless transmitter UP - for mechanical buttons

With the CALIMA wireless chime Bluetooth microSD battery + wireless transmitter, classic wired doorbell systems can be modernised to a wireless doorbell system without having to change the bell push on the front door. Suitable for many of our doorbells and letterboxes. This set is suitable for 1 bell push (up to 11 push buttons/radio transmitters UP possible per receiver). An additional set must be used for each additional party.

Would you like to hear a specific melody when the doorbell rings? With a microSD card, MP3 files can be set as a chime melody on the CALIMA 800*. This way, CALIMA 800 announces your visit with your favourite song. When paired with your smartphone via BLUETOOTH®, the CALIMA 800 wireless chime becomes a portable loudspeaker that plays your music anywhere in the house. As soon as the doorbell rings, the music is interrupted and the doorbell sound is played. The music then continues to play. Thanks to its long range, CALIMA 800 reliably announces your visitors or suppliers even at a greater distance from the radio transmitter.

- All menu settings for the CALIMA 800 are made using two buttons. With the acoustic announcement, you always know which menu item you are in.
- **Visual LED signal**
- LED ring with colour selection for visual signalling.

Installation

- 1. install the MISTRAL radio transmitter in a flush-mounted box or the function box behind the existing bell button
- 2. pair the MISTRAL radio transmitter with the radio chime receiver
- 3. by pressing the existing bell button, the radio transmitter sends a signal to the radio chime receiver.

Notes

- Walls, doors, metal parts etc. can noticeably reduce the range!
- *MicroSD card not included in the scope of delivery.
