Product number 562-STLPK-SPL-SF-GI106V

Product description

Design Mailbox Parcel Column GRIMM with GIRA System 106 - Prepared for 3 Units – The Premium Solution for Mail & Parcels

The Design Mailbox Parcel Column GRIMM combines modern design, high-quality craftsmanship, and maximum flexibility. Made from **2 mm stainless steel V2A 1.4301** and powder-coated in a **colour of your choice**, the pillar impresses with its timeless elegance and extreme robustness. Thanks to its **fully welded construction**, there are no visible screws or rivets, creating a particularly sophisticated appearance. The **mailbox and parcel box module** is also installed using invisible screws – for a premium look at the highest level.

Particularly practical: The modules can be exchanged even after many years. This keeps your mailbox parcel column always flexible and future-proof. This model is manufactured by the **Mailbox Manufactory in Bad Salzuflen** – quality work "Made in Germany."

A special feature of the system is the proven mechanical parcel lock with T-handle, which allows for delivery independent of the courier: The courier simply places the parcel in the openly accessible compartment and locks it with a simple click. The compartment remains locked until the authorised user opens it with their key. A clever solution – without electronics, without an app, but with maximum security. Whether DHL, UPS, DPD, GLS, Hermes or TNT – any parcel service can use the parcel box. This means you can receive your deliveries securely and conveniently at any time, even when you are not at home.

The mailbox GRIMM is not only an optical highlight but also leads in terms of functionality and quality. Thanks to the innovative push-key lock, the mailbox can be easily and comfortably operated with one hand. Open the door with a push and close it without using a key. The lock is optimally protected against weather influences. Additionally, the mailbox features an intelligent retrieval system: The door opens from top to bottom, ensuring that the mail stays securely in the box and does not fall out towards you. The mail is also comfortably inserted from the front, with high-quality axle dampers ensuring a smooth closing of the insertion flap. The elegant, flush design of this mailbox with GIRA System 106 allows for the installation of up to three system modules (not included in the delivery) in a stable and flexible holding system. The optional surface-mounted housing (5503910) is required for the installation of the Gira components. Thanks to the well-thought-out holding system, the GIRA modules can be easily exchanged or expanded at any time. This keeps your system flexible, modern, and future-proof.

According to DIN/EN 13724 standards, the GRIMM is ideal for large letters in C4 format, which can be placed inside without creasing. The mailbox GRIMM impresses with its durable quality, timeless design, and thoughtful functionality.

Mailbox Module with Function Box – Comfort and Functionality

- Made of 2 mm stainless steel V2A 1.4301, powder-coated in your choice of colour.
- The Gira System 106 can be seamlessly integrated into the flush design. Preparation is provided for 3 GIRA 106 system modules. The modules can be mounted flush using the simple holding system (surface-mounted housing 5503910 required!). WITHOUT GIRA system components!
- Innovative push-key lock including 2 keys with key number, easy locking without a key, optimally protected from weather conditions.
- The retrieval door with opening limiter opens from top to bottom, preventing your mail from falling out.
- Front insertion with high-quality axle dampers for very quiet mail insertion.
- Mailbox compliant with DIN/EN 13724, insertion size (3.5 cm x 32.5 cm) for C4 horizontal – even large letters remain intact. Additional retrieval protection integrated from stainless steel.
- Optimal weather protection through raised cover plate.
- Double-box system: The cover can be easily installed after construction work is completed and can be replaced at any time.

Parcel Box Module – Secure and Generous

- Made of 2 mm stainless steel V2A 1.4301, powder-coated in your choice of colour.
- Parcel volume: 130 litres – ideal for large shipments.
- Maximum parcel dimensions: 505 × 655 × 340 mm (W × H × D).
- Front parcel retrieval door 510 × 660 mm, opens from left to right.
- Door equipped with durable stainless steel hinges.
- Innovative T-handle parcel lock with snap closure.
- Includes 2 keys with key number.
- Symbol "PARCEL" as stainless steel laser engraving.

Construction & Details

- Fully welded support column made of 2 mm stainless steel V2A 1.4301, powder-coated in your choice of colour.
- Height: 1.70 m.
- Invisible cable routing possible through the body.
- Base plate made of stainless steel (10 mm thick), concealed by an elegant cover plate.
- No visible screws or rivets – seamless design.
- Modules can also be replaced after years – maximum future security.

Important Information:

To achieve optimal water protection for your mail, the mailbox or mailbox system should ideally be located under a canopy.

The mail is only protected from water if it is completely placed in the box and the insertion flap is closed. Mail that is not fully inserted allows moisture and dirt to enter the mailbox. This system is protected against water ingress according to DIN EN 13724. Water entry is not a reason for complaint.

Product properties

Surface/colour	RAL 9005 deep black, RAL 3004 crimson red, DB 703 iron mica, RAL 7016 anthracite grey, RAL of your choice (according to colour table), RAL 9007 grey aluminium, RAL 9016 traffic white
Series	GRIMM
Functions	Camera, Intercom, Parcel compartment
Functional box prepared for manufacturer	GIRA
Number of boxes	with 1 parcel box, with 1 letterbox
