9-unit stainless steel mailbox system Design BASIC Plus 385XW for side wall mounting - RAL colour of your choice | Right | with 9 mailboxes

Product number 385XW-9S-R

Product description

Side-mounted BASIC Plus 385XW mailbox system for 9 tenants – box position right

The BASIC Plus 385XW is a high-quality stainless steel mailbox system for side wall mounting for 9 tenants. It has been developed for larger residential properties, office buildings and mixed-use properties and enables space-saving installation to the side of the front door or on a suitable wall surface.

With nine mailboxes arranged one above the other, the 385XW is aimed at larger properties where available wall width is limited.

The mailboxes are made of stainless steel V2A 1.4301 and are powder-coated in a RAL or DB colour of choice. The rain hood and side cladding are also made of stainless steel. Side mounting is carried out via 60.3 mm stainless steel posts with a 240-grit brushed finish.

In this product variant the box position is on the right. The lateral arrangement creates a clear installation edge and allows the mailbox system to be aligned with the entrance situation on site.

The benefits of the BASIC Plus 385XW at a glance

Solid stainless steel mounting posts

Side wall mounting is carried out via Ø 60.3 mm posts made of stainless steel V2A 1.4301 with a 240-grit brushed finish. They provide a stable and durable connection between the mailbox system and the building wall.

Side wall mounting

The 385XW is mounted to a suitable external wall on the side. The box position for this variant is on the right; this allows the system to be adjusted precisely to the existing entrance situation.

BASIC Plus in stainless steel V2A

Mailboxes, cladding and the fixing elements consistently use stainless steel V2A 1.4301. The powder-coated mailboxes combine a high-quality surface with a durable construction.

DIN C4 insertion with rubber lip

Each mailbox has an insertion opening of 35 × 265 mm suitable for DIN C4 upright. A noise-damping rubber lip reduces the impact noise of the insertion flap.

Robust solution for 9 tenants

Nine full-size mailboxes provide a durable, modular solution for larger residential and commercial properties. The modular BASIC Plus construction also facilitates maintenance and spare parts installation.

Equipment of the BASIC Plus 385XW for 9 tenants

Mailbox system

Number of mailboxes 9 mailboxes
Arrangement 1 column × 9 rows
Material Stainless steel V2A 1.4301
Finish Powder-coated in RAL/DB colour of choice
Rain hood / side cladding Stainless steel V2A 1.4301, powder-coated to match
Manufacture Made in Germany by Briefkasten Manufaktur Lippe

Mail and operation

Insertion opening 35 × 265 mm per mailbox, suitable for DIN C4 upright
Mail volume Approx. 12 litres per mailbox
Insertion flaps With noise-damping rubber lip
Mail removal From the front
Door opening Left to right
Keys 18 keys in total, 2 per mailbox
Nameplates 9 interchangeable nameplates beneath the insertion flaps

Side mounting

Box position Right
Mounting posts Ø 60.3 mm stainless steel V2A 1.4301
Post finish 240-grit brushed
Type of installation Screw fixing to a suitable external wall
Fixings Select anchor bolts or hanger bolts on site appropriate to the wall
Standard Mailboxes conforming to DIN EN 13724

Note on side wall mounting

The wall must be clean, even and sufficiently load-bearing for the weight of the complete mailbox system. Anchor bolts or hanger bolts are not included and must be selected to suit the wall construction, system weight and local installation conditions.

Note on weather protection

Mail items must be fully inserted so that the insertion flaps can close. The insertion front should preferably not face the main exposure to the elements directly. In extreme weather conditions, moisture may penetrate despite compliant construction.

Maintenance and BASIC Plus construction

Stainless steel V2A is low-maintenance and durable. The modular BASIC Plus construction is designed for straightforward installation and good spare parts availability.

Product properties

Surface/colour	RAL 9005 deep black, RAL 3004 crimson red, DB 703 iron mica, RAL 7016 anthracite grey, RAL of your choice (according to colour table), RAL 9007 grey aluminium, RAL 9016 traffic white
Series	BASIC
Number of boxes	with 9 letterboxes
Boxes by volume	Normal > 10 litres
Name labelling	Nameplate
Material	Stainless steel V2A 1.4301
House number	House number as laser engraving
Removal of mail	On the front
Mounting type	Surface-mounted
