Product number 215-UP-1-SPS-2N-3FACH-L

Product description

Design flush-mounted mailbox GOETHE UP, side-mounted with 2N Verso – prepared for 2N Solo – RAL colour of your choice

High-quality flush-mounted mailbox with lateral integration of the models 2N IP VERSO, 2N IP SOLO and 2N LTE VERSO in a flush-fit design. The modern GOETHE mailbox is ideal for a sophisticated entrance area. Its clean, linear shape without a visible lock gives this mailbox an especially elegant appearance. The 2N video intercom can be seamlessly integrated into the flush-fit design and replaced at any time.

The dimensions of the single box provide a capacity of approximately 16 litres; the large letter slot ensures that DIN-C4 envelopes and magazines — or post after several days' absence — are not creased. The innovative push-key lock is concealed inside the mailbox. The key is simply inserted into the existing opening (no turning required) and the door opens. The arrangement of the lock and the design of the retrieval door prevent your post from falling out towards you. Thanks to the water drainage edge, the post inside is optimally protected from weather. The letter flap is fitted with high-quality pivot dampers, ensuring quiet closing and preventing annoying rattling caused by weather conditions.

The mailbox systems of the GOETHE® collection are characterised by the consistent use of stainless steel. The result is very high durability and sustainability. The construction has been developed by our own engineers with a focus on high flexibility and modularity, easy spare parts assembly and straightforward self-installation. Spare parts for all GOETHE® systems are available directly in our shop.

Thanks to the design, self-installation is straightforward.

Protected utility model according to DPMA file reference DE: 20 2021 101 679.5

- Optionally with laser-cut house number and name inscription.
- Plaster cover frame made from stainless steel angle profile 25 x 58 mm, powder-coated in RAL colour.
- **Preparation is provided for 1–3 2N modules. WITHOUT 2N system components!**

Important information

Camera or intercom station preparation

The intercom systems must be connected by a qualified electrician. Please consult the electrician of your choice for planning, installation and commissioning.

Water protection

To achieve optimal water protection for your post, the mailbox or mailbox system should, where possible, be located under a canopy.

Post items are only protected from water if they are placed completely inside the box and the insertion flap is closed. Post that is not fully inserted can allow moisture and dirt to enter the mailbox. This system is protected against water ingress according to DIN EN 13724. Water ingress is not a reason for complaint.

Product properties
