Gira System 106 EKEY sLine module - Built-in module for finger scanner ekey sLine - Stainless steel V2A | Stainless steel, brushed

Product number S106-204702-VA

Product description

Gira System 106 EKEY module - installation module for finger scanner ekey sLine - stainless steel V2A

This ekey module for the Gira System 106 is an installation module in the colour stainless steel that enables the flush-mounted finger scanner from ekey to be installed. ATTENTION Finger scanner is not included.

The Gira System 106 is an installation system made of real metal in a purist, elegant design without a frame, based on a basic dimension of 106.5 × 106.5 mm. With the modular door station in the Gira System 106, hospitality begins at the front door. From the call button, voice and camera module to the info and dummy module, all functions are presented in a harmonious overall picture. In the dark, the backlit call buttons with labelling field ensure good legibility and an attractive appearance.

System 106 can be used in detached houses and apartment blocks, as well as in office buildings, industrial premises and hotels. The modular structure allows the system to be customised in size, design and functionality to suit individual requirements. Extensions and changes can be easily made at any time by exchanging modules. Even a pure front change is possible with the system. This means that the appearance of the system can also be changed at a later date, e.g. from traffic white to a stainless steel finish, without having to replace the electronic units.

Simple installation and step-by-step assembly. The system can be installed in various stages in parallel with the construction progress. For example, it is possible to install only the lower part of the surface-mounted housing first during shell construction, and then add cables and modules when they are needed.

Technical data

Ambient temperature: -25 °C to +70 °C

Protection class: IP54
