Surface-mounted mailbox STORM with DoorBird D1100E IP video door intercom - RAL 7016 anthracite grey | RAL 7016 Anthracite grey, fine texture, matt | DoorBird | with 1 mailbox

Product number 480A-1-7016-SPO-DB

Product description

STORM surface-mounted mailbox system with DoorBird D1100E IP video door intercom

The STORM surface-mounted mailbox system with DoorBird D1100E combines a robust mailbox with modern IP video door communication. Mailbox, camera, intercom and illuminated doorbell button form a visually coordinated unit for single-family homes, smaller residential buildings, offices and practices.

The mailbox system is manufactured from galvanised steel and powder-coated in RAL 7016 anthracite grey, fine texture matt. The streamlined STORM design is complemented by the flush-integrated DoorBird D1100E and a round illuminated stainless-steel push button. This creates a modern entrance solution without an additional, separately mounted housing for the door intercom.

The DoorBird D1100E enables video and audio calls to smartphones and tablets with iOS or Android. Visitors can therefore be seen and spoken to not only inside the building but also while you are on the move. Connection to SIP-capable phones and compatible building systems is also possible.

The advantages of the STORM mailbox with DoorBird D1100E at a glance

DoorBird Authorized Partner

DoorBird D1100E directly integrated into the STORM system

The DoorBird D1100E is visually neatly integrated into this STORM surface-mounted mailbox system. The result is a modern and high-quality entrance solution comprising mailbox, illuminated doorbell button, camera and IP video door intercom – without an additional, separately mounted door station housing.

1080p camera with 180° wide angle

Video and audio calls are transmitted directly to smartphones and tablets. The hemispheric ultra-wide-angle lens also captures visitors standing to the side. Infrared LEDs support visibility in low-light conditions.

Control door and gate via app

The configurable switching relay can, for example, control an electric door release or a compatible gate operator. Time and action schedules also allow automated processes.

Motion sensor and visitor history

The integrated 4D motion sensor monitors the desired area in front of the unit. Images of detected or ringing visitors can be reviewed in the free visitor history.

Flexible network and smart home integration

Connection is via LAN, PoE or WLAN. SIP support and an open local API enable integration into compatible telephone systems, smart home systems and building controls.

Large letter slot for DIN C4

The 35 × 340 mm letter slot also accepts larger envelopes and mailings in DIN C4 landscape format without them needing to be folded.

Quiet and comfortable operation

High-quality rubber buffers dampen the letter flap when closing. The retrieval door opens downwards in a controlled manner and features an opening stop.

RAL 7016 fine texture matt

The anthracite-grey powder coating gives the STORM mailbox a modern, understated surface and permanently protects the galvanised steel.

For surface-mounted wall installation

The mailbox is mounted directly onto a suitable wall surface. The required mounting screws are already included in the scope of delivery.

Strong value for money

The added value lies in the well-thought-out overall solution: instead of assembling mailbox, doorbell and video door station as separate components, you receive an entrance solution that is already designed to match. The DoorBird technology is integrated directly into the STORM design. This reduces planning effort while at the same time creating a permanently high-quality solution for the entrance area. Especially in new build or modernisation projects this creates a clear added value: professional door communication and mailbox functionality are conceived from the outset as a single system.

Equipment of the STORM mailbox system

Mailbox

Material Galvanised steel
Finish RAL 7016 anthracite grey, fine texture matt
Letter slot 35 × 340 mm, suitable for DIN C4 landscape
Letter flap With rubber buffers for quiet closing
Mail collection From the front, door opening downwards
Standard Mailbox compliant with DIN EN 13724

DoorBird D1100E

Camera 1080p HDTV with 180° ultra-wide-angle
Communication Video and two-way audio via the DoorBird app
Night vision Infrared LEDs with integrated light sensor
Motion detection Integrated 4D motion sensor
Door control Configurable bistable switching relay
Network LAN, PoE or WLAN as well as SIP and local API

Scope of delivery and installation

Doorbell button Round illuminated stainless-steel push button
Keys Two keys with key number per mailbox
Nameplate Protected changeable nameplate under the letter flap
Cladding Rain hood and side panels made of coated steel
Mounting type Surface-mounted installation on a suitable wall
Manufacture Made in Germany by Briefkasten Manufaktur Lippe

Requirements for DoorBird use

DoorBird functions require a suitable power supply and a network or WLAN connection. Door releases, gate operators and other components must be compatible with the chosen connection type. Installation and commissioning should be carried out by qualified personnel.

Note on weather protection

For optimal protection of mail we recommend installation under a canopy or in a sheltered entrance area. Mail items must be fully inserted so that the letter flap can close completely.

Note on wall mounting

Before installation, the load-bearing capacity and condition of the wall must be checked. Depending on masonry, concrete or existing façade insulation, additional wall plugs or specialised fixing systems may be required.
