Product number 215-STL-PK600-1BK-SPL-IND

Product description

Free-standing XXL parcel box GOETHE with 1 mailbox and provisions for camera and intercom on the left - sluice system - RAL colour of your choice

Parcel delivery has changed significantly in recent years – customers today expect more flexibility and security than ever before. With the **parcel mailbox GOETHE** from Briefkasten Manufaktur you opt for an ideal combination of innovative technology and outstanding design, manufactured from high-quality stainless steel and aluminium, powder-coated in the RAL colour of your choice.

 Compatible with common manufacturers: LOXONE, Siedle, Busch-Jaeger, Gira, TCS, Legrand BTicino, Ritto, STR Elektronik, ELCOM, HHG, Comelit, Mobotix, HIKVISION and many more available on request.

The **mailbox** (H x W 400 x 400 mm) is made from stainless steel 1.4016 (non-rusting, magnetic stainless steel), powder-coated in a RAL colour of your choice. It is fitted with an innovative Push-Key lock, keyed alike with the parcel box lock and supplied with ten keys. Letter insertion and collection are from the front. The insertion flap is fitted with high-quality hinge dampers, allowing mail to be deposited particularly quietly. The mailbox complies with **DIN/EN 13724** with an entry size of 3.5 x 36.0 cm – sufficient for C4 envelopes in landscape format without bending. The collection door opens downwards so that your mail cannot fall towards you. The dimensions of the mailbox provide an approximate capacity of 64 litres. The innovative Push-Key lock is discreetly concealed inside: the key is simply inserted – no turning required – and the door opens.

The generous **parcel box** (H x W 600 x 1200 mm) is also made from stainless steel 1.4016, powder-coated in a RAL colour of your choice. It offers a volume of 192 litres and allows delivery of parcels up to a size of 555 x 375 x 305 mm (W x H x D), corresponding to DHL parcel size L. The parcel insertion flap is damped and closes particularly quietly. Thanks to the specially developed delivery sluice, your parcel is automatically transferred into the secured retrieval compartment after insertion. The sluice is immediately ready for further deliveries and remains isolated from the retrieval compartment – keeping your consignments optimally protected at all times. Every carrier (e.g. DHL, DPD, TNT, GLS, Hermes) can use the parcel mailbox. Depending on placement, up to four DHL parcels size M may even fit inside.

Briefkasten Manufaktur places the greatest value on high-quality materials. Stainless steel ensures extremely high corrosion resistance and an elegant surface finish. Quality assurance begins with the selection of our raw material suppliers and only ends when the parcel mailbox reaches you in the required quality. Trust the **parcel mailbox GOETHE** – a secure, flexible and stylish solution for your mail and parcel delivery. A product that combines traditional craftsmanship with the latest technology – Made in Germany by Briefkasten Manufaktur Lippe.

- High-quality parcel mailbox made from stainless steel and aluminium, powder-coated in the colour of your choice.
- Quality manufacturing - Made in Germany by Briefkasten Manufaktur Lippe.
- Mailbox (H x W 400 x 400 mm) made from stainless steel 1.4016 (non-rusting magnetic stainless steel), powder-coated in a RAL colour of your choice with stainless steel laser-engraved pictogram "BRIEF".
- 2 innovative Push-Key locks with 10 keys, keyed alike.
- Letter insertion and collection from the front. Insertion flap with high-quality hinge dampers for very quiet mail insertion.
- The mailbox complies with DIN/EN 13724. Entry size (3.5 cm x 36.0 cm) for C4 landscape – large letters fit without bending.
- Collection door opens downward. This prevents your mail from falling out towards you.
- Parcel box (H x W 600 x 1200 mm) made from stainless steel 1.4016 (non-rusting magnetic stainless steel), powder-coated in a RAL colour of your choice with stainless steel laser-engraved pictogram "PAKET".
- Parcel compartment volume: 192 litres, max. parcel dimensions: 555 x 375 x 305 mm (W x H x D), corresponding to parcel size L.
- Parcel insertion flap with damping for quiet closing.
- Function compartment (H x W 200 x 400 mm) made from stainless steel 1.4016 (non-rusting magnetic stainless steel), powder-coated in a RAL colour of your choice.
- Provision for intercom (built-in speaker not included). Optionally with universal adaptor for all common built-in speakers.
- Optional provision for a camera (camera not included).
- Either replaceable nameplate in stainless steel with laser engraving or nameplate in acrylic (Plexi) available.
- 8–12 V DC short-travel doorbell push-button with LED ring illumination (blue, white, red or green). The illumination of the doorbell push-buttons cannot be powered via the control unit. They must be connected to an additional 8–12 V DC power supply.
- Optional 8–12 V DC short-travel illuminated push-button with pictogram available.
- Includes EVN LED power supply / transformer IP65 12 V DC 0.1–4 W for the LED lighting (house number, doorbell and nameplate if selected).
- Optimal protection against rain thanks to drip edges and a rain canopy made from 3 mm aluminium AlMg3 W19, powder-coated in a RAL colour of your choice.
- Side cladding made from 3 mm aluminium AlMg3 W19, powder-coated in a RAL colour of your choice.
- Rear panel made from 1 mm stainless steel 1.4301 V2A, powder-coated in a RAL colour of your choice.
- Base made from 40 x 40 x 2 mm stainless steel tube 1.4301 V2A, powder-coated in a RAL colour of your choice.
- Invisible fixing and cable routing inside the post. Overall height is 1.65 m.

Important information

Protection against water

To achieve optimal protection of your mail from water, the mailbox or mailbox system should, where possible, be installed under a canopy.

Mail is only protected from water if it is placed completely inside the box and the insertion flap is closed. Mail that is not fully inserted allows moisture and dirt to enter the mailbox. This system is protected against the ingress of water in accordance with DIN EN 13724. Ingress of water is not grounds for a complaint.
