Module prepared for 1/2" water tap | RAL 7016 Anthracite grey, fine texture, matt

Product number BML-9860-STKD-376-H2O12-7016

Product description

Module prepared for water taps

The modular tap module is the ideal addition to the ORDO modular socket columns and allows the integration of a water connection into a functional supply column. It has been specifically designed for use in modular column systems and is ideal for outdoor areas, garden areas, commercial spaces or locations where electrical and water connections should be centrally available.

The tap module is designed for easy installation. It is inserted into the designated module receptacle of the socket column and securely fixed there. The thoughtful construction enables rapid replacement of individual modules, allowing extensions or adjustments to be implemented efficiently.

The module is prepared for the connection of a tap. The scope of delivery includes a weld-on sleeve Rp 1/2" made of stainless steel 1.4571 according to DIN 2986 as well as a 90° screw-in elbow Rp 1/2" internal thread to R 1/2" external thread made of zinc-plated malleable cast iron. The prepared design facilitates on-site installation of a suitable tap.

Note: Delivery does not include a tap. The module is prepared exclusively for the on-site installation of a suitable 1/2" tap.

Module colour: RAL 7016 anthracite grey fine-textured matt

Product properties

Material Stainless steel V2A 1.4301
